
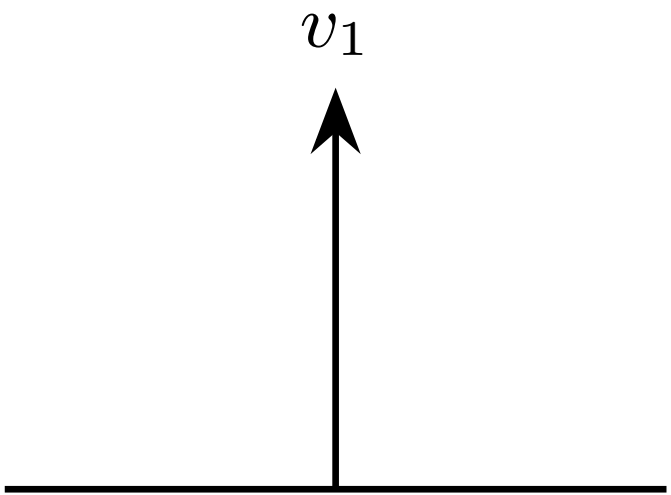
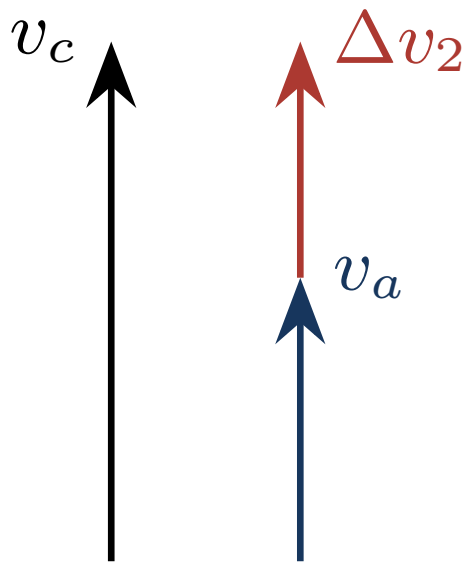
地球位于椭圆的一个焦点；按半径比例绘制

地表



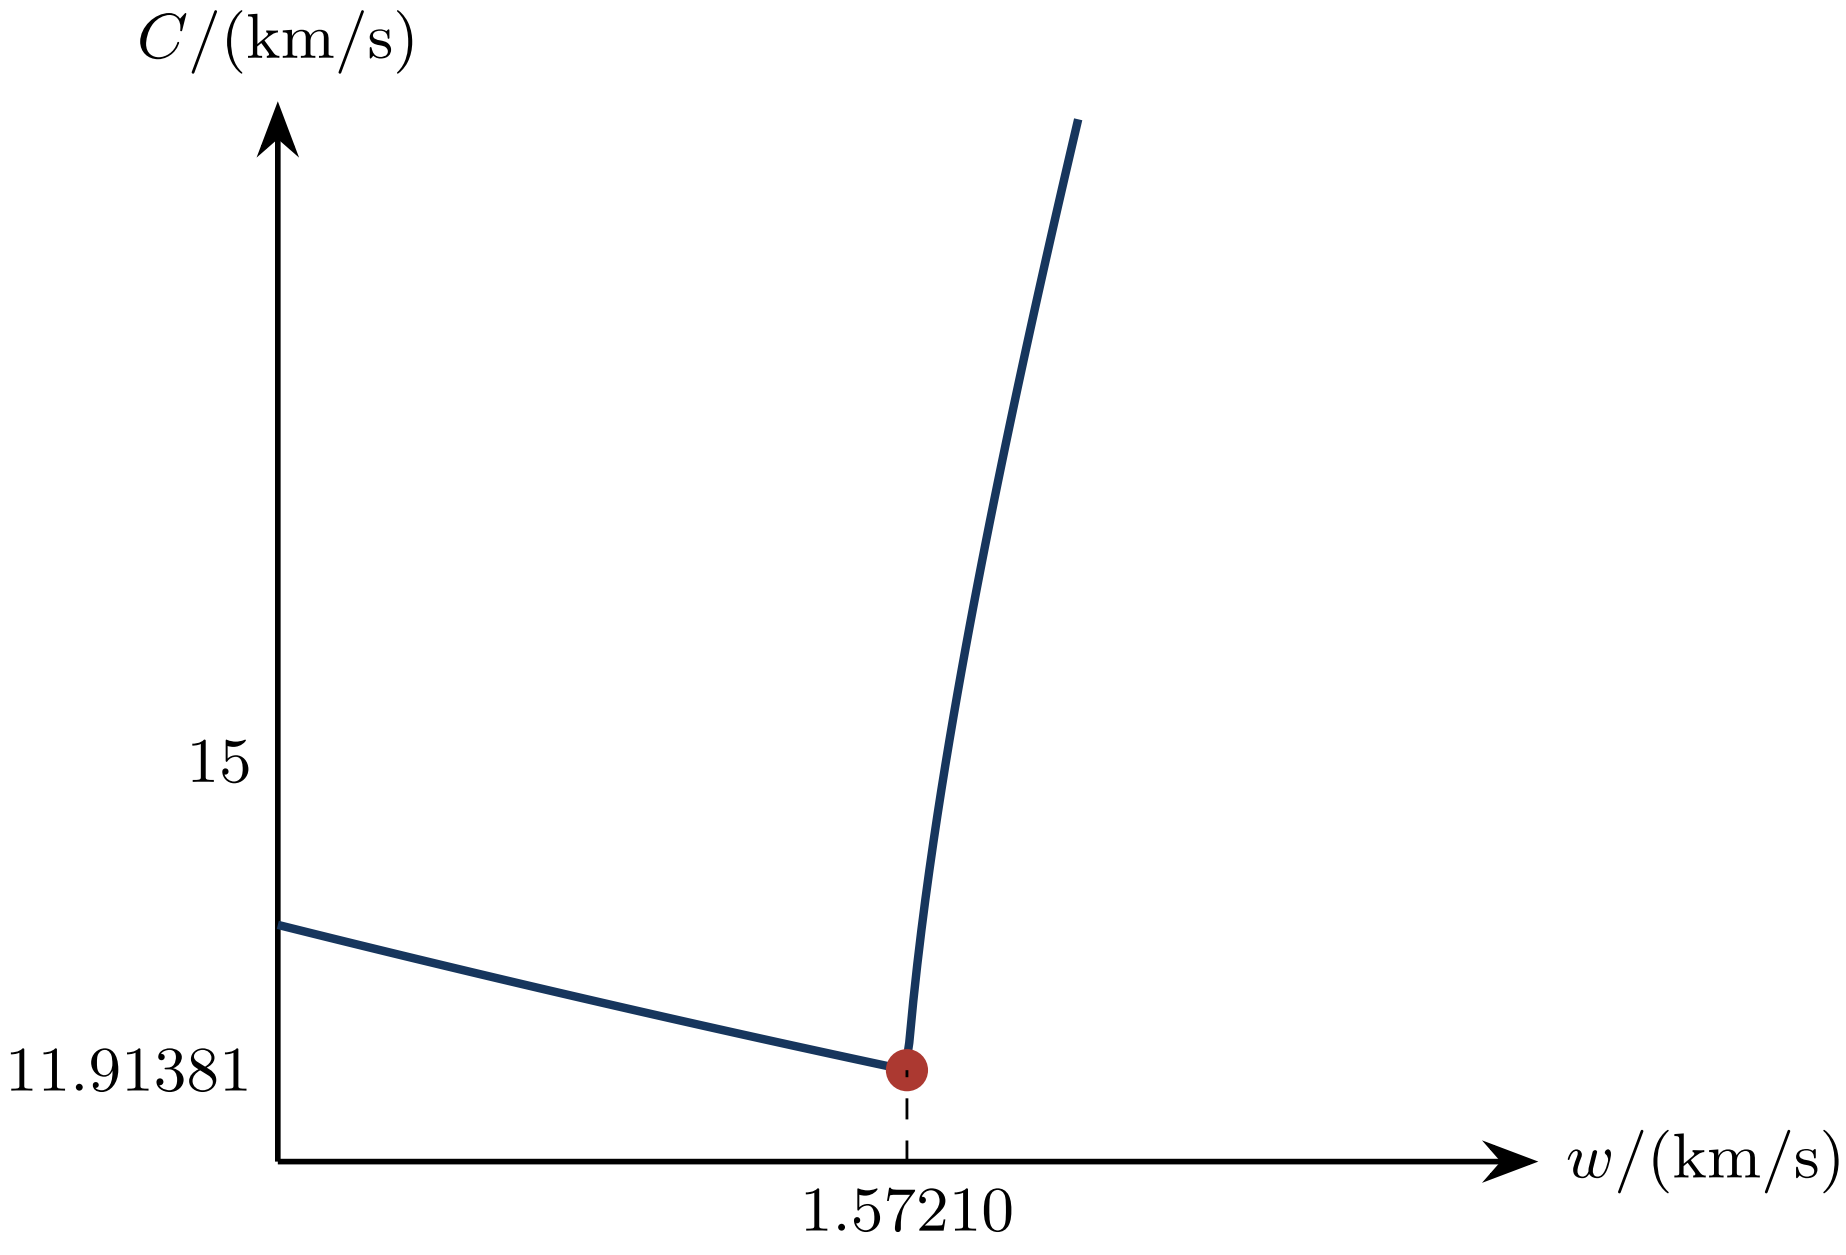
最优径向分量为零

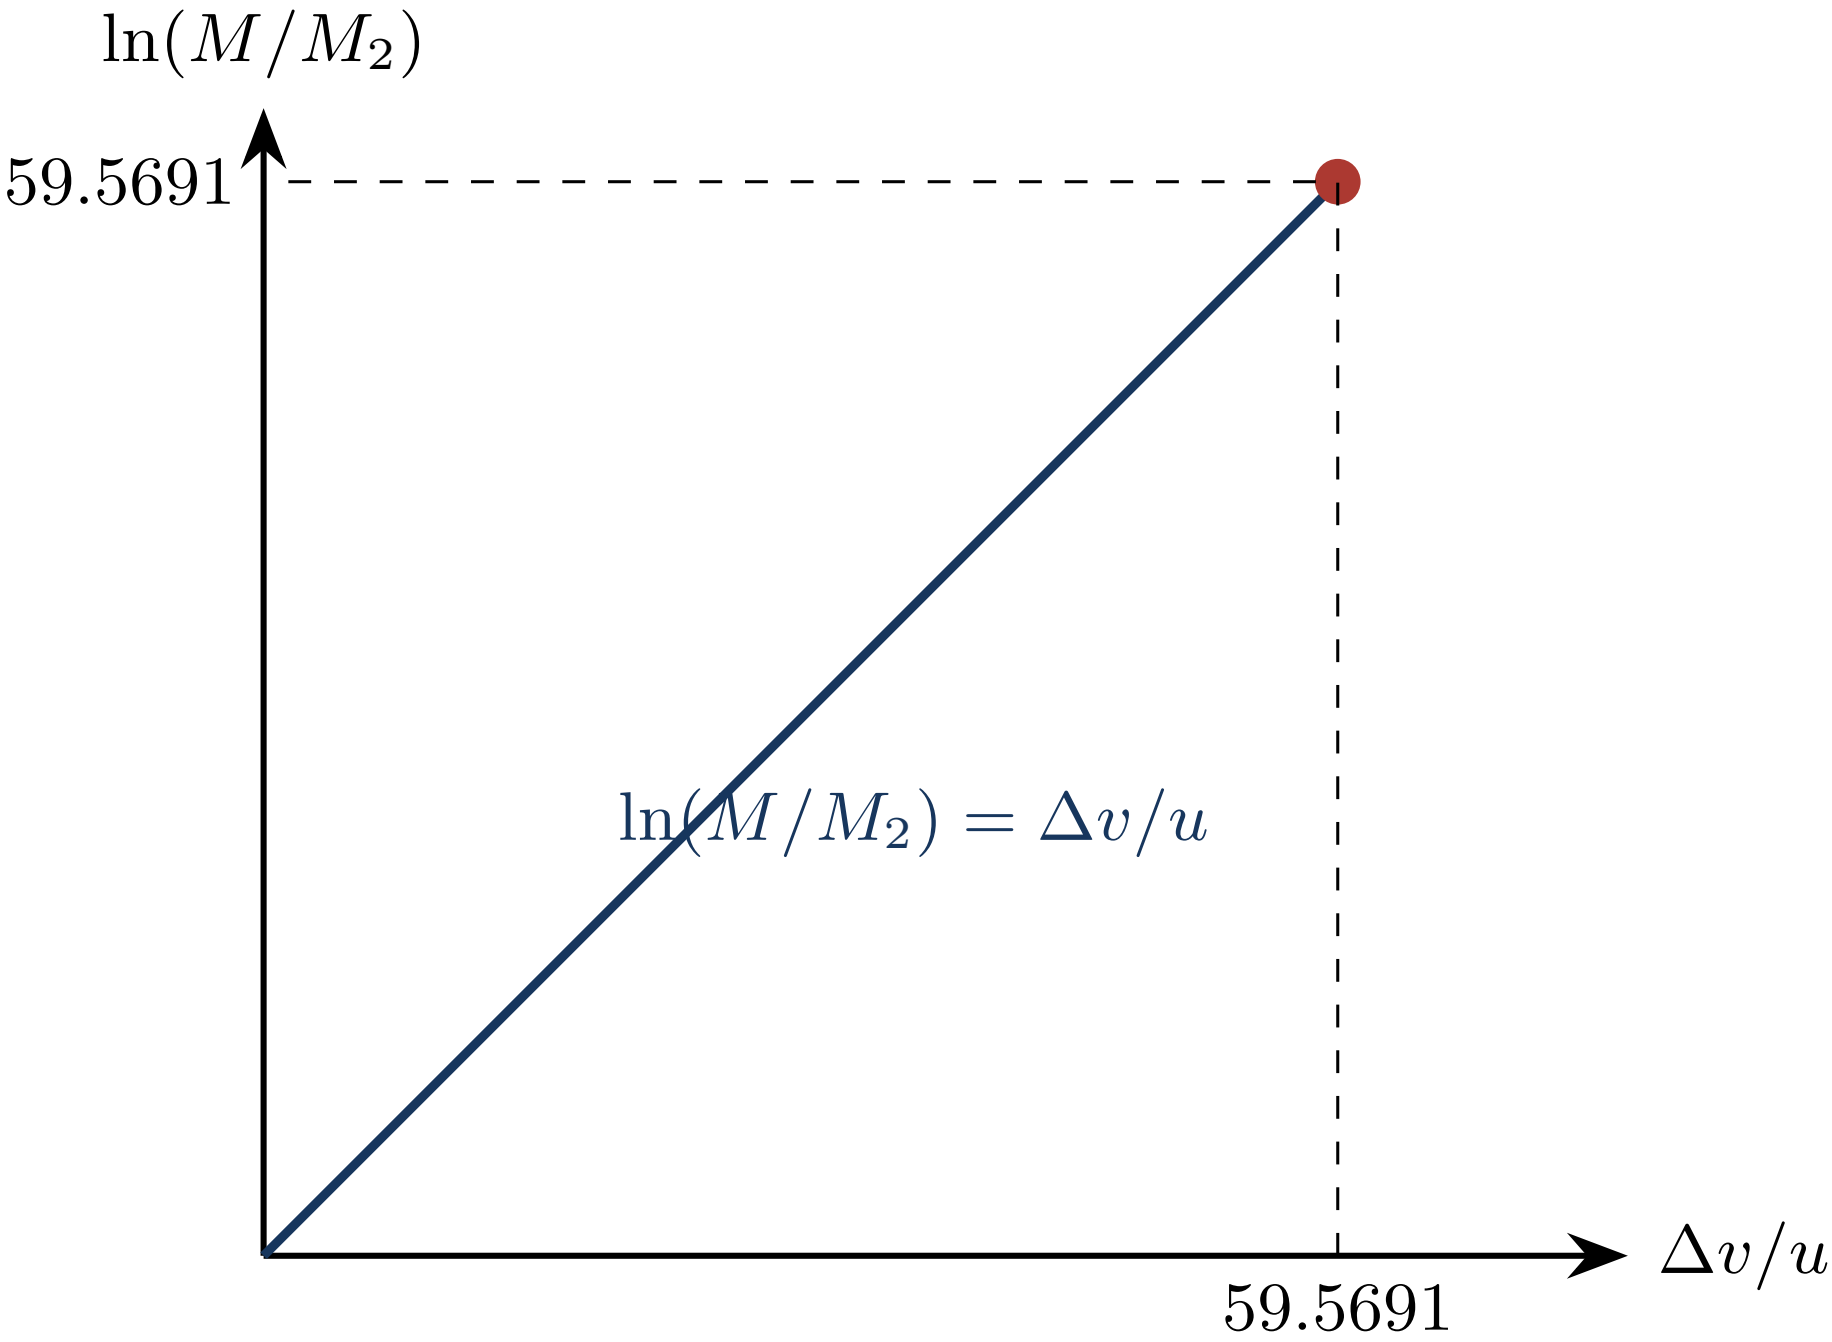
同步半径



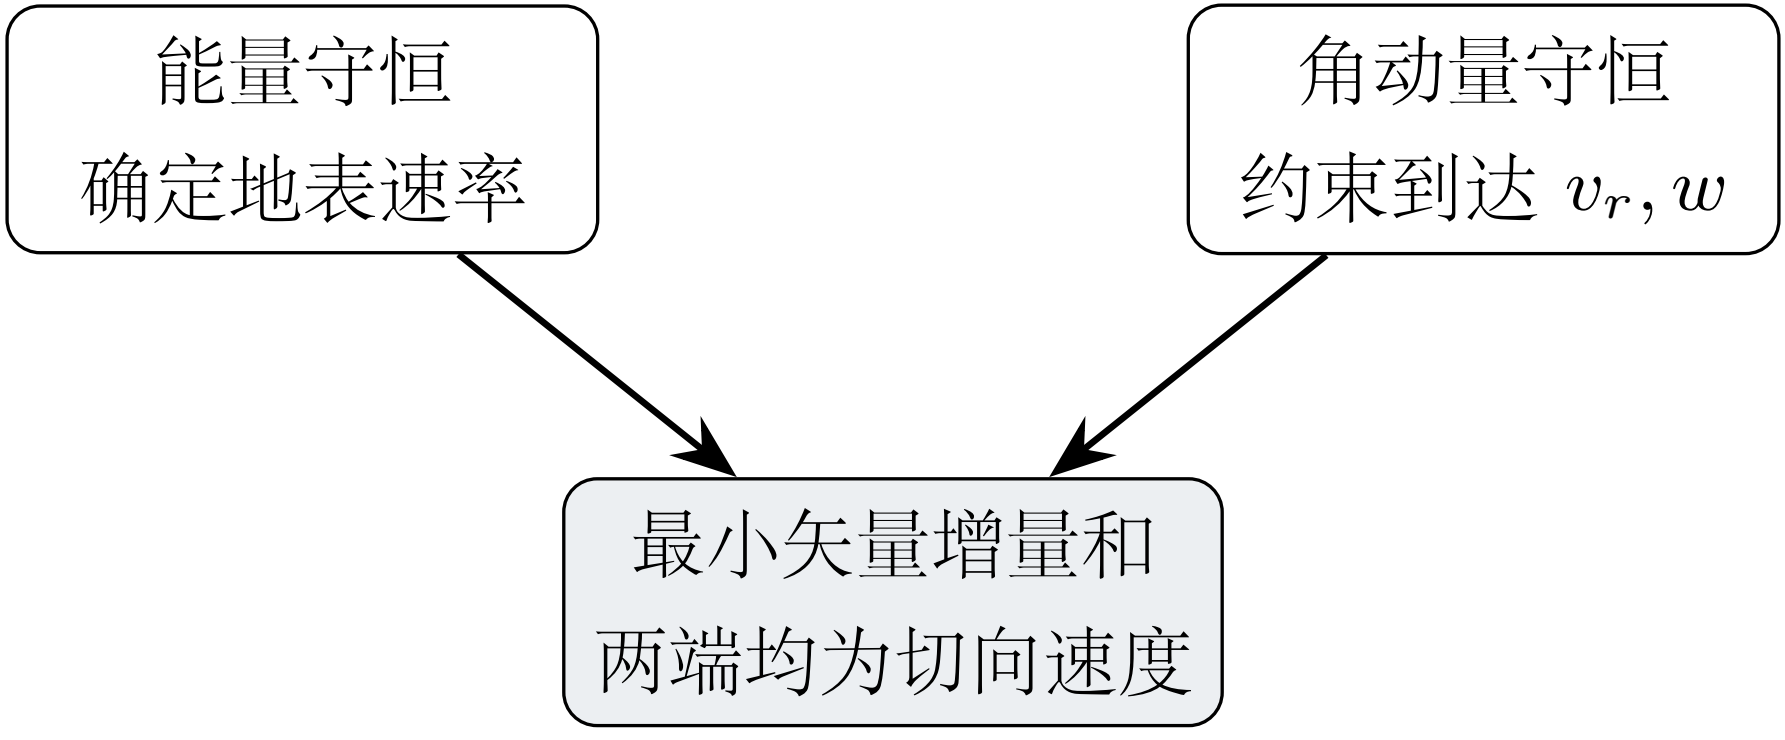
$$\Delta v_2 = v_c - v_a$$

左段递减，右段递增，分界点最优





$$M/M_2 = 7.42185 \times 10^{25}$$



地表静止初态：第一增量等于完整 v_1
