
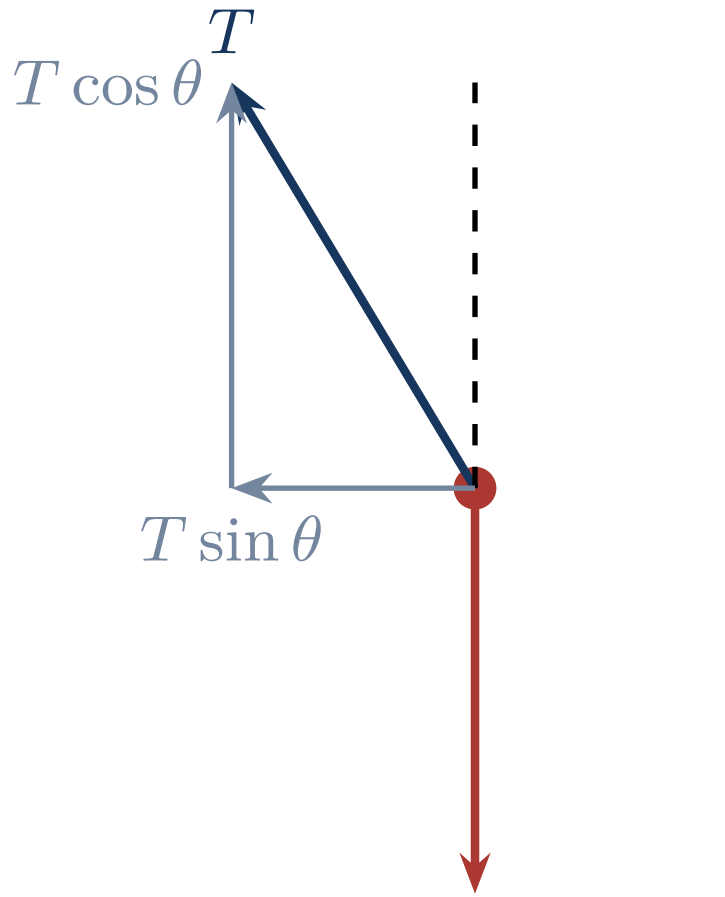
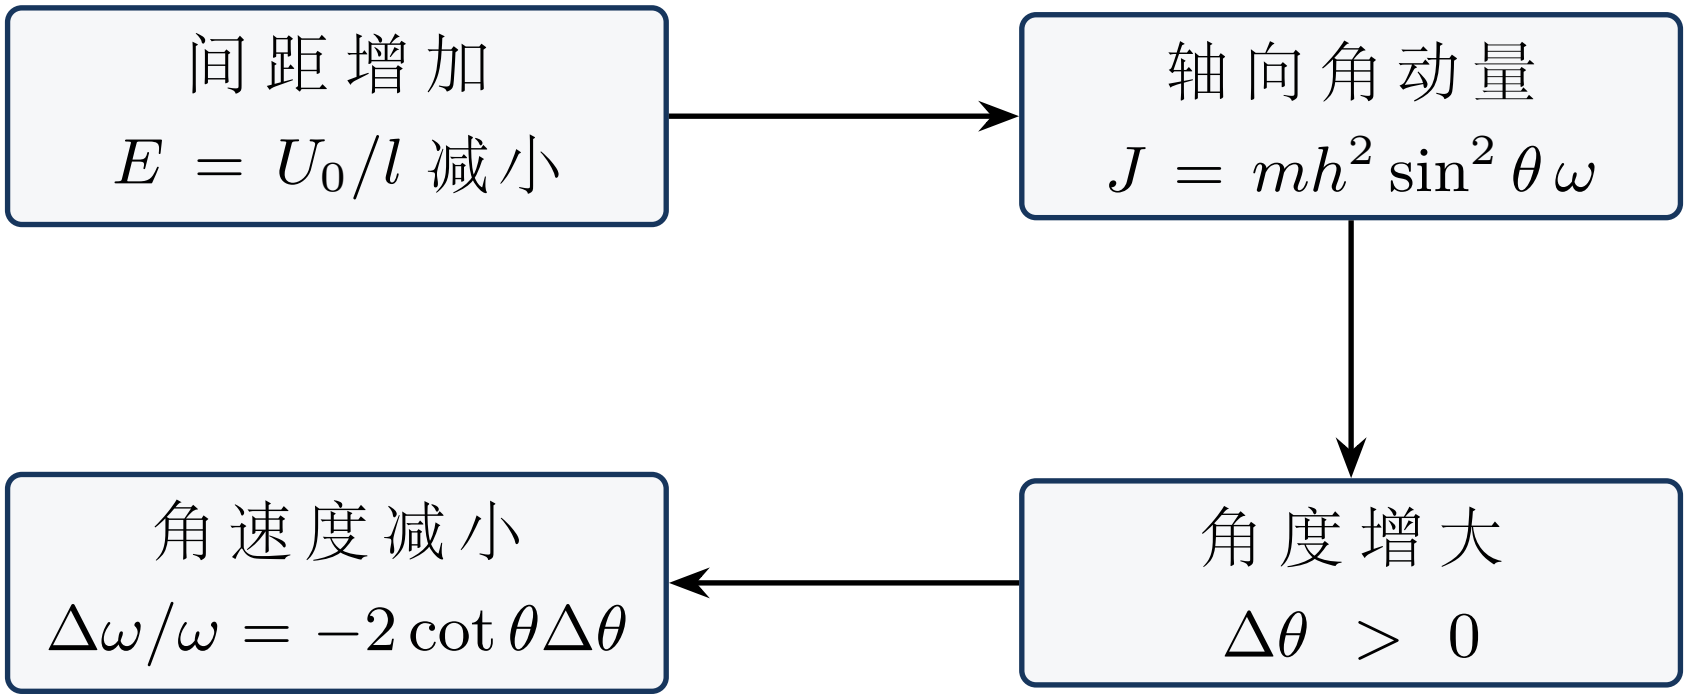
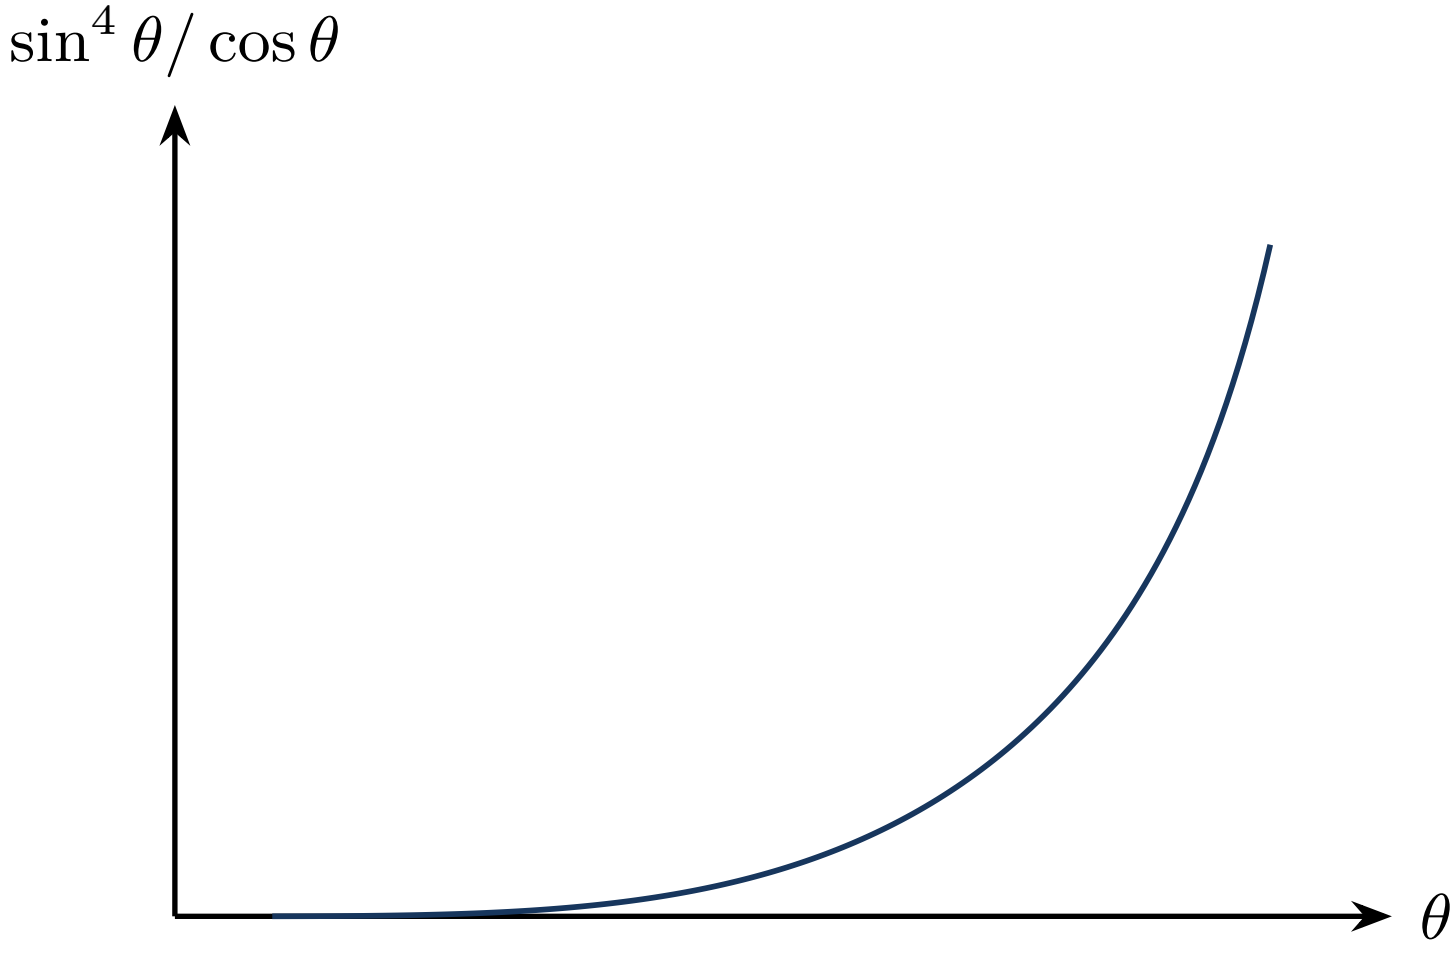
下板缓慢下移，固定电压 U_0



$$T\cos\theta = W;\ T\sin\theta = m\omega^2 h\sin\theta$$

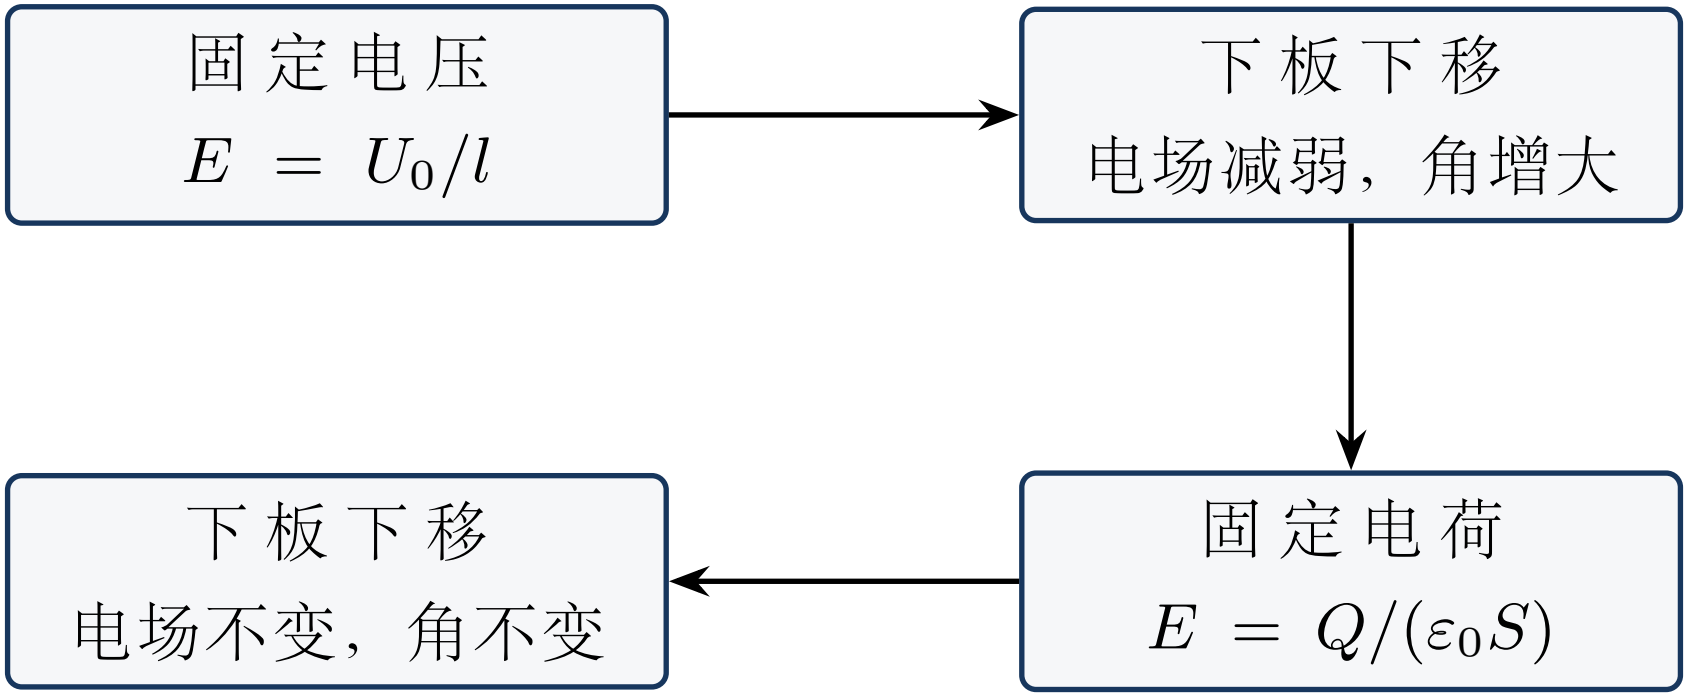


无外加轴向力矩；完整角动量矢量不必守恒



$W\sin^4\theta/\cos\theta$ 固定

W 减小需要角函数增大，故倾角增大



面积 S 在恒压下的局部受力结果中不出现
