
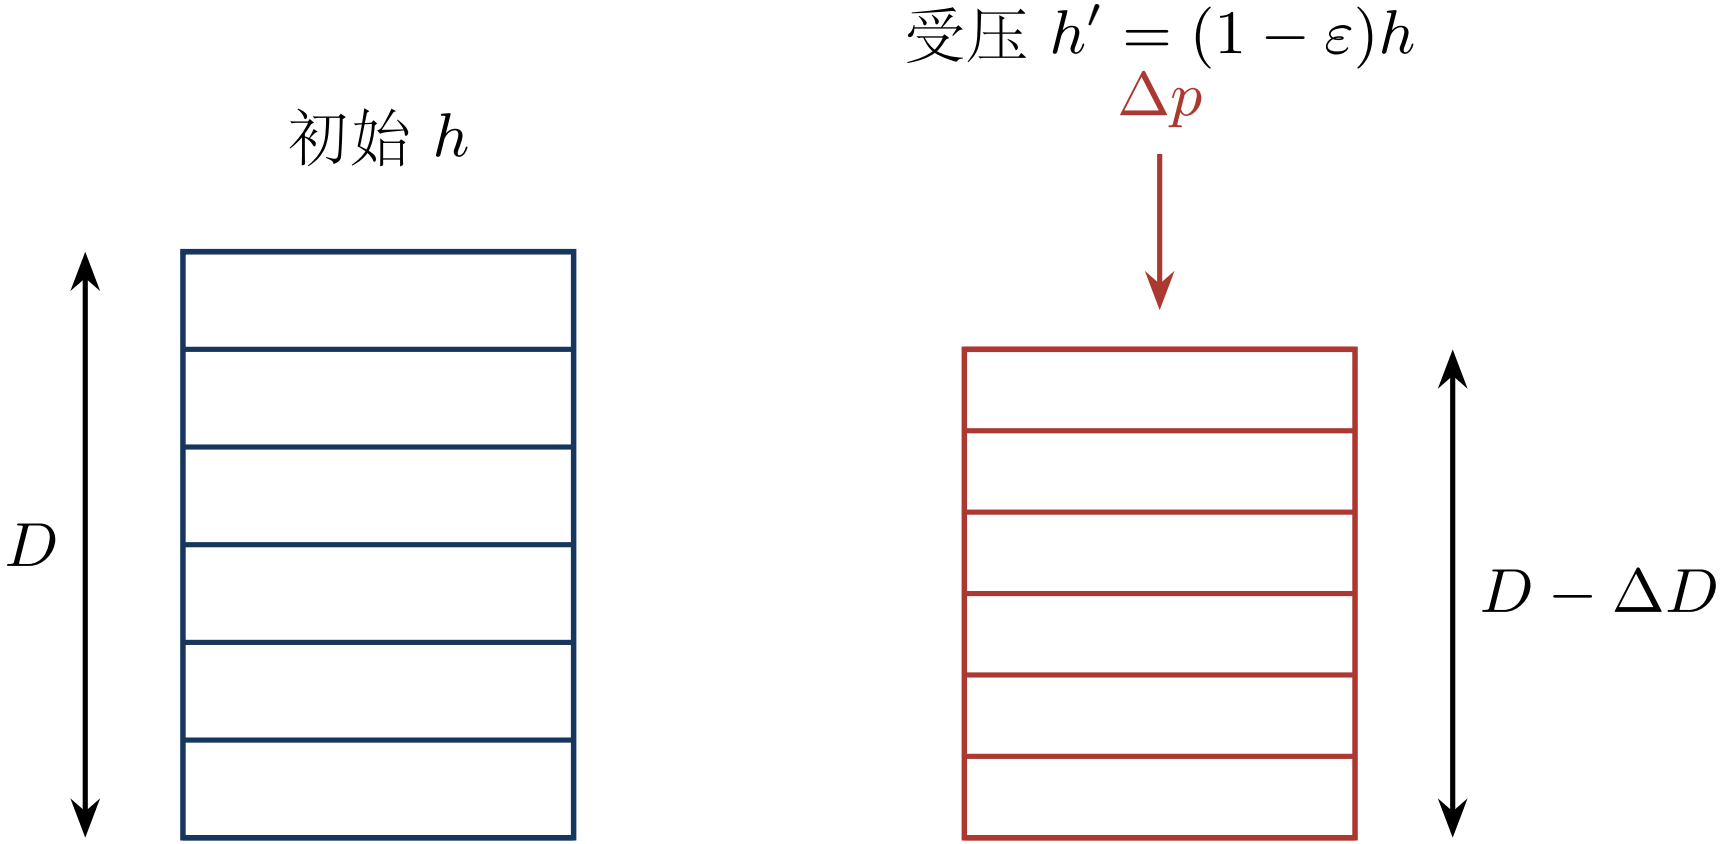
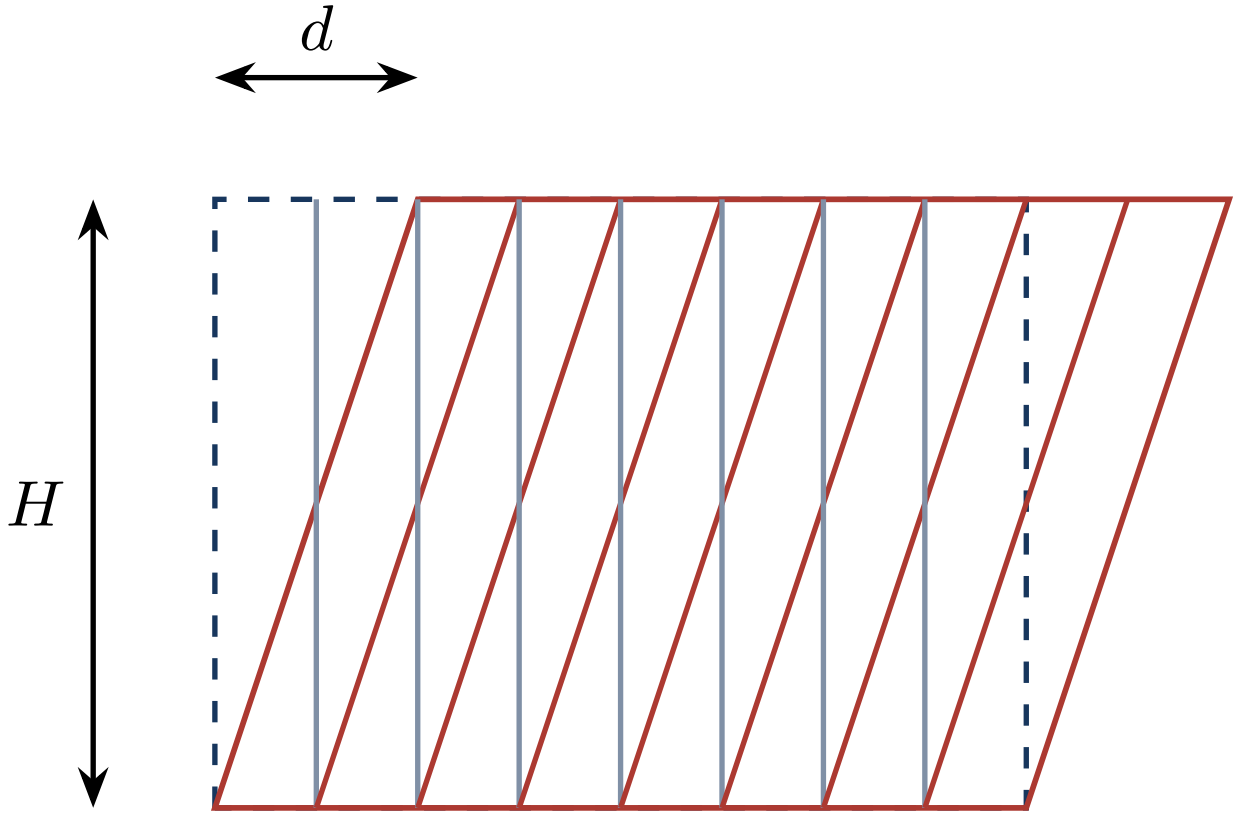
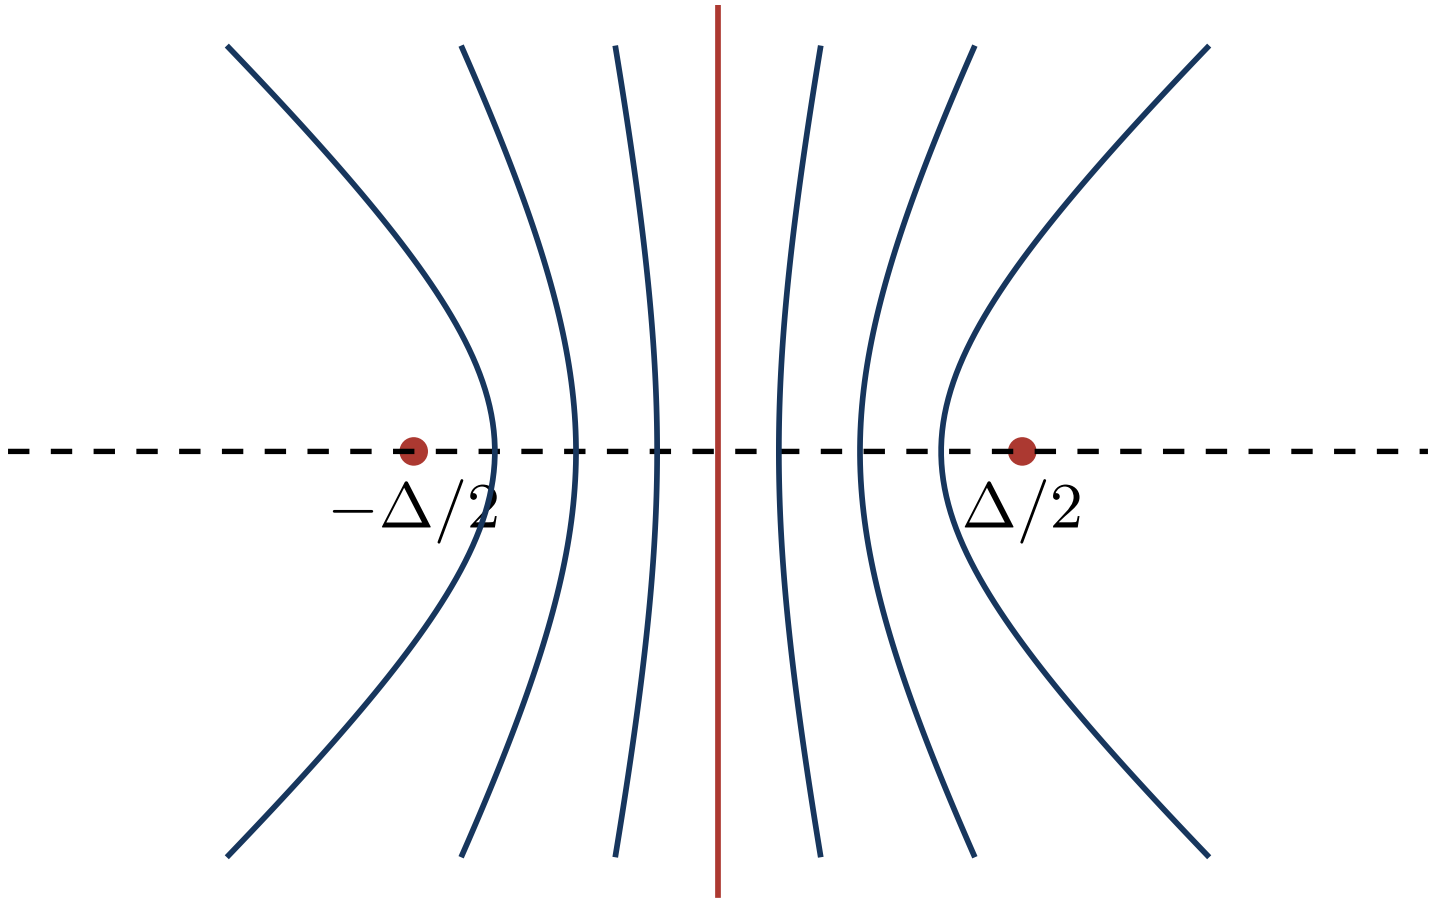
蓝色参考纹与红色受力纹；亮暗带取决于相位差累积



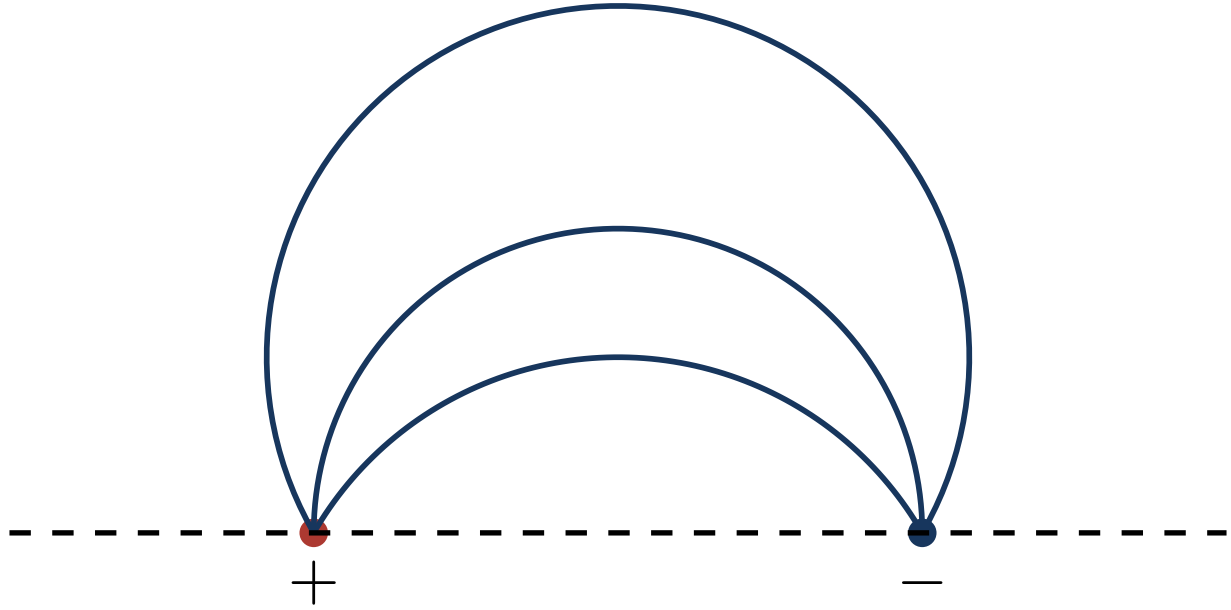
$\lambda = h(1-\varepsilon)/\varepsilon$；图中应变已放大



$$u_x(z) \;=\; \gamma z\,,\;\; \gamma \;=\; d/H \;=\; \tan\theta\,;\;\; \gamma\lambda \;=\; h$$



$r_- - r_+ = kr$；中心线为 $k = 0$，双曲线需按符号选支



恒定有向角差的圆弧；等量异号无限长线电荷的电场线
