
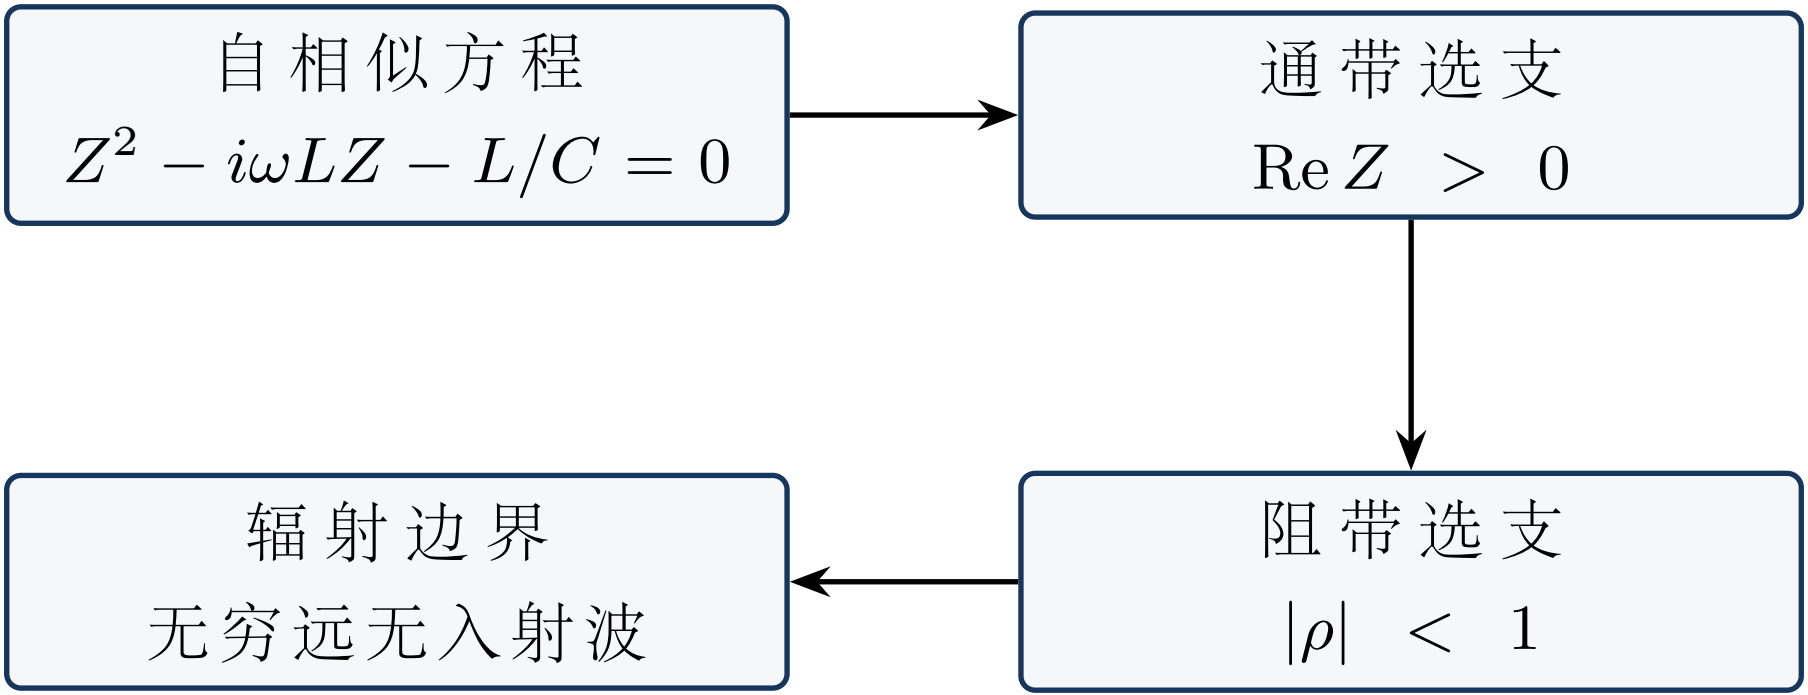
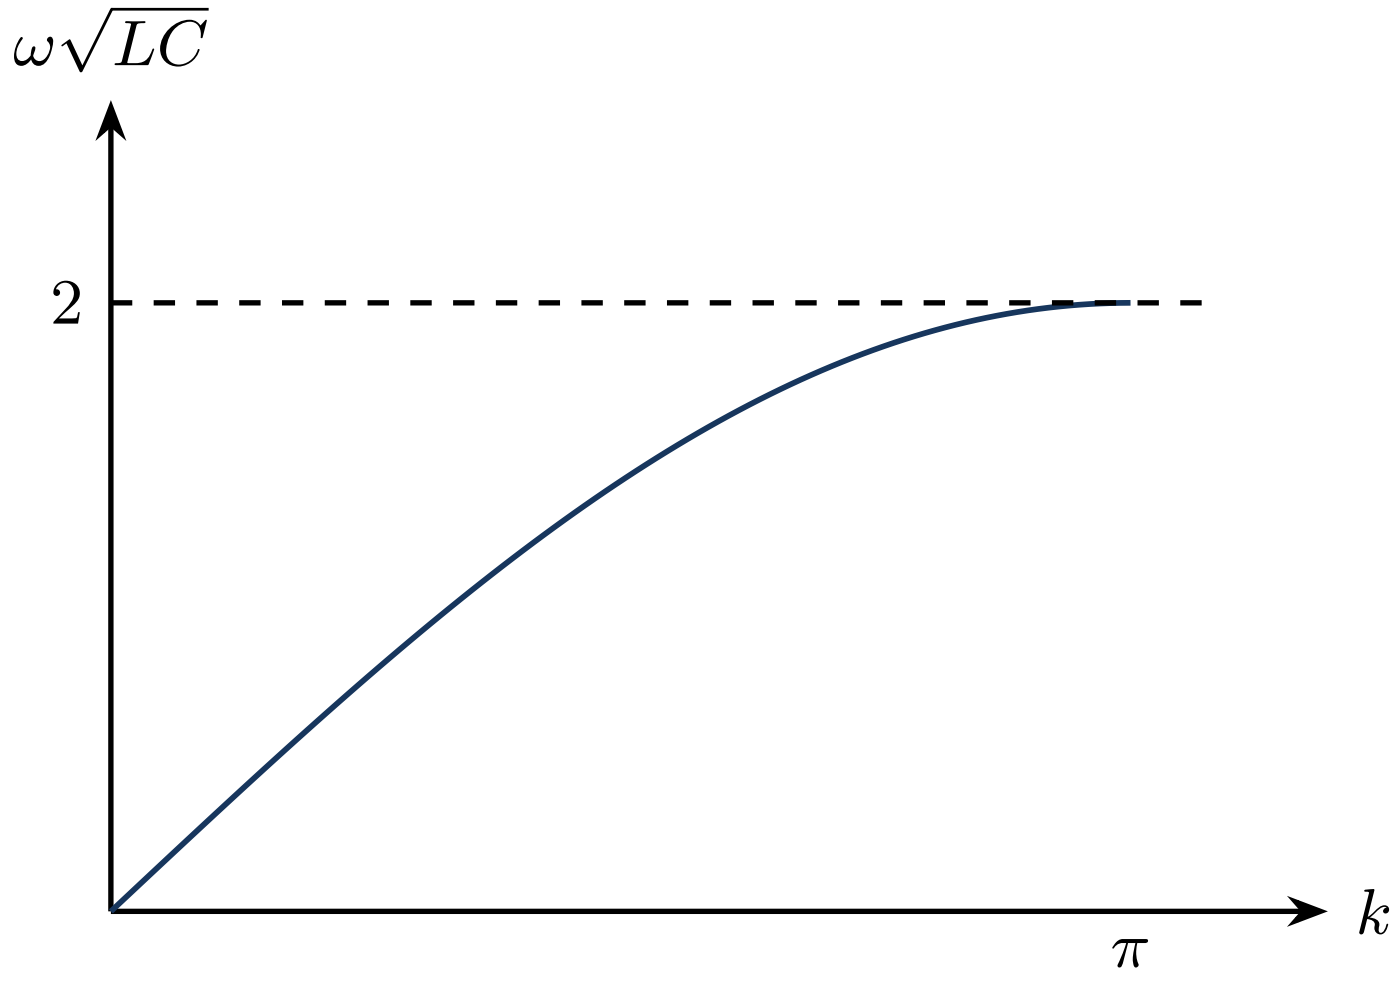
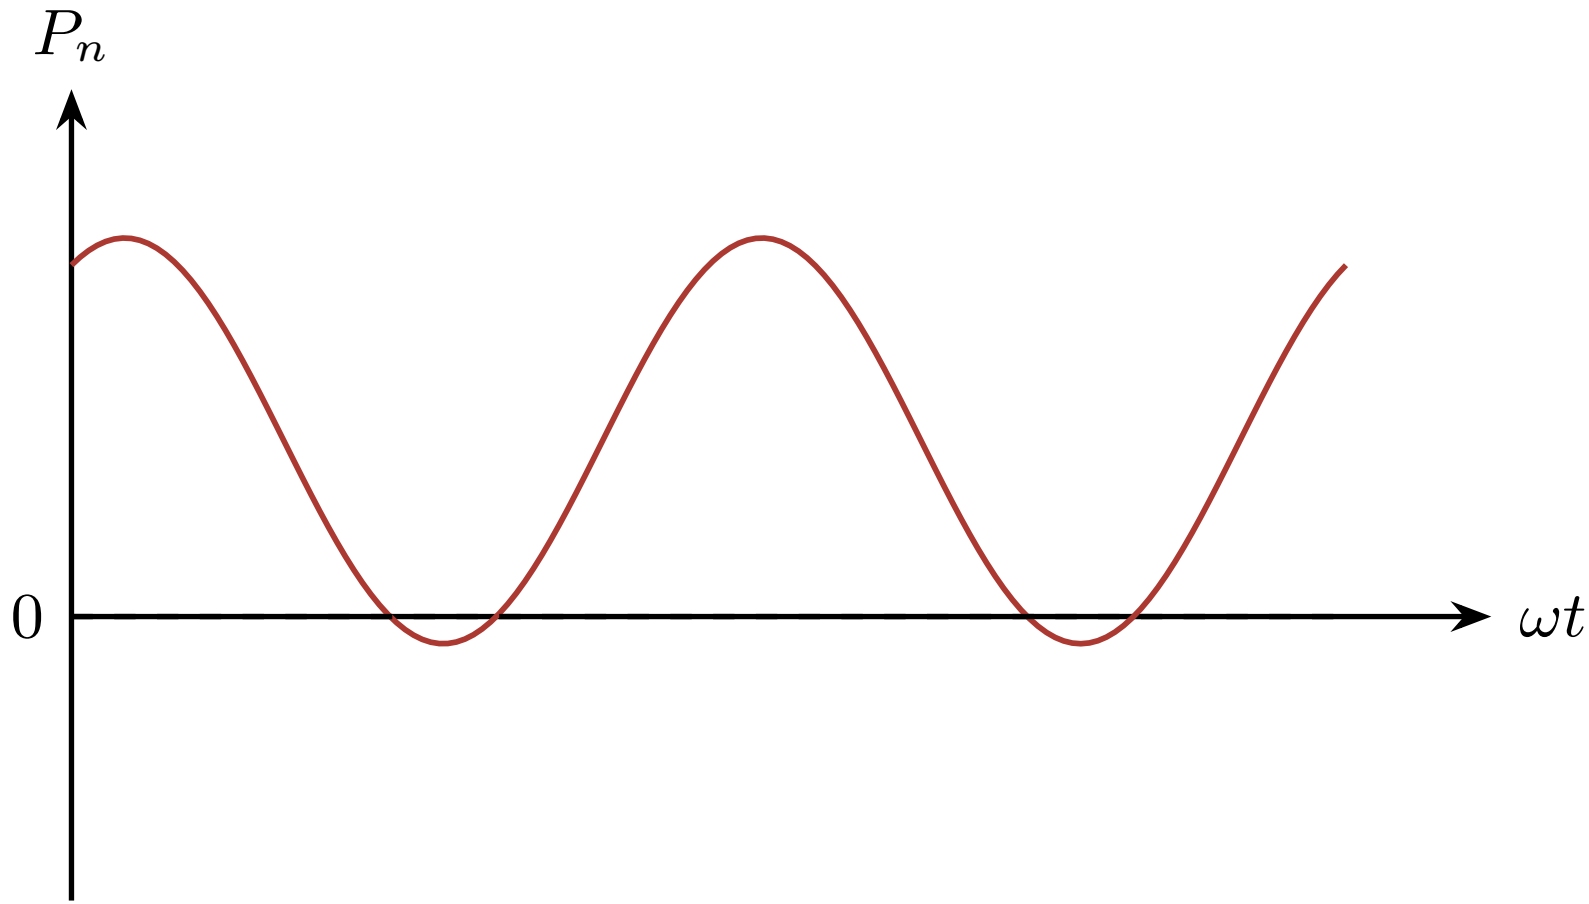
源端记节点 0；节点 n 右边仍是一整节输入阻抗 Z



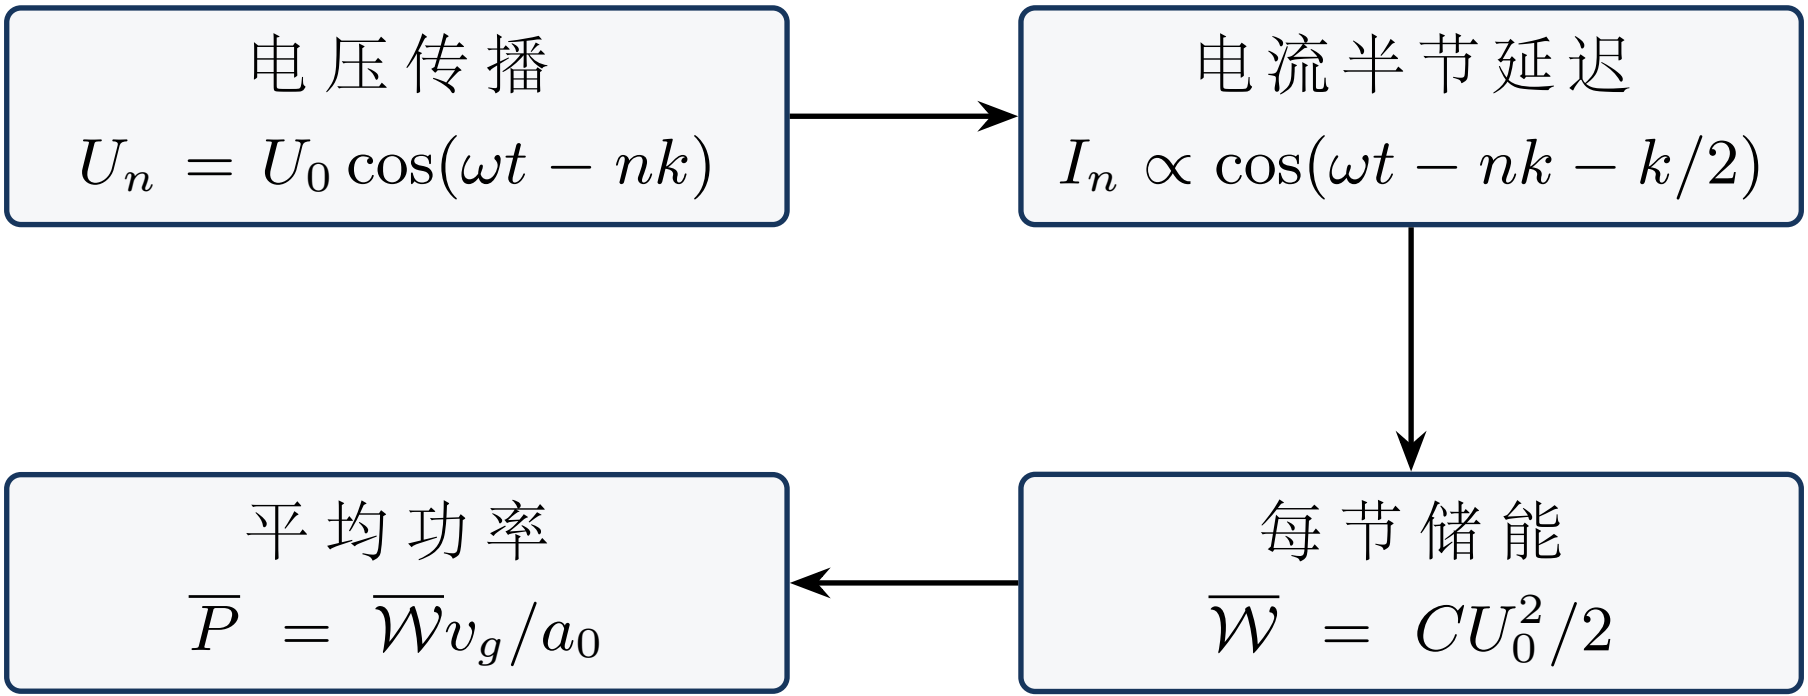
形式二次根必须以被动性与空间有界性选择



$\omega\sqrt{LC} = 2\sin(k/2)$；带边群速度趋零



示例 $k = \pi/3$、$n = 0$；瞬时可反向，平均仍为正



阻带纯无功、平均功率零；带边形式解不能视为有限储能
