
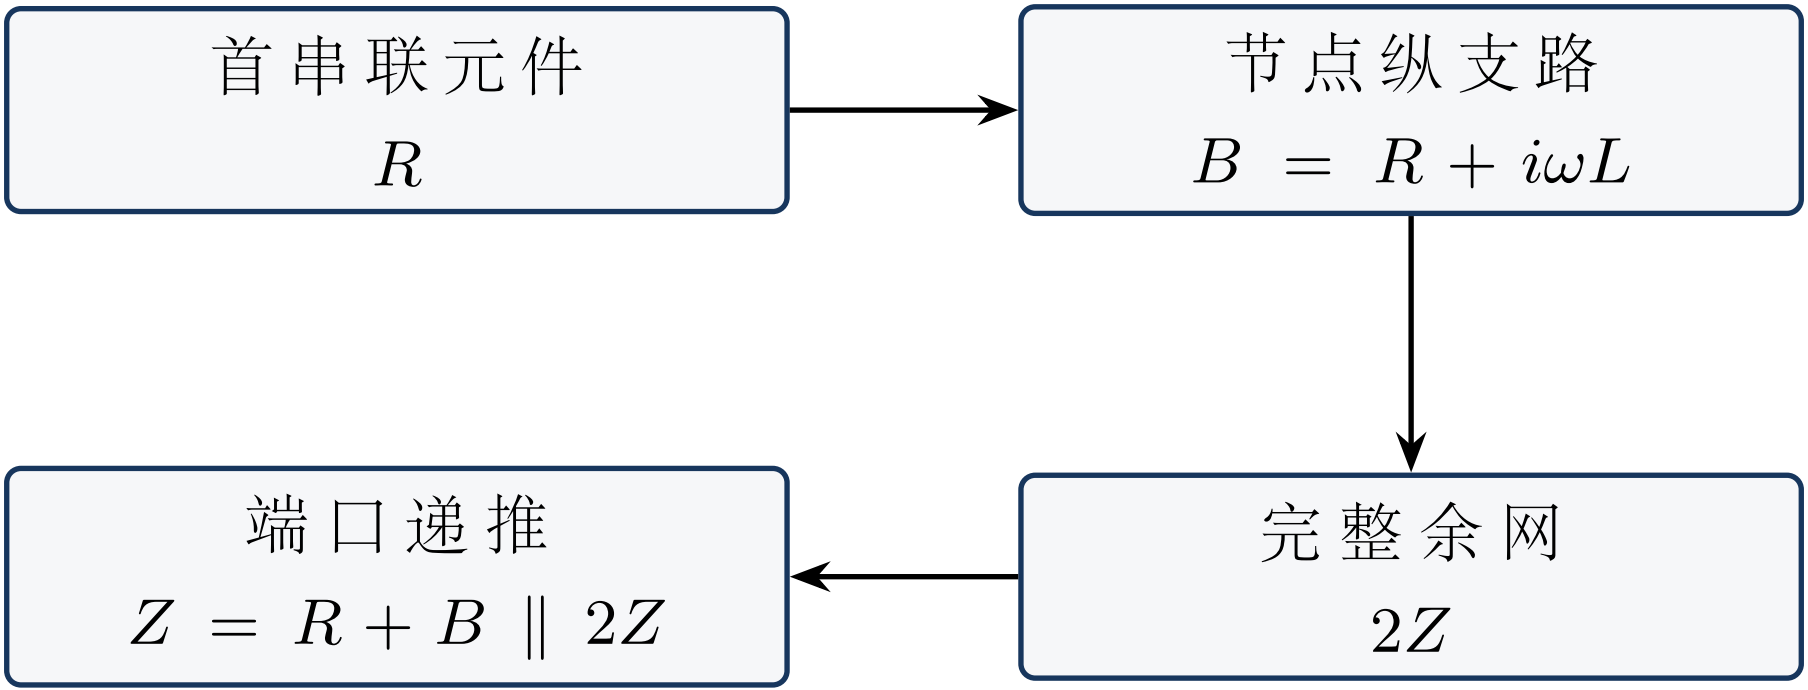
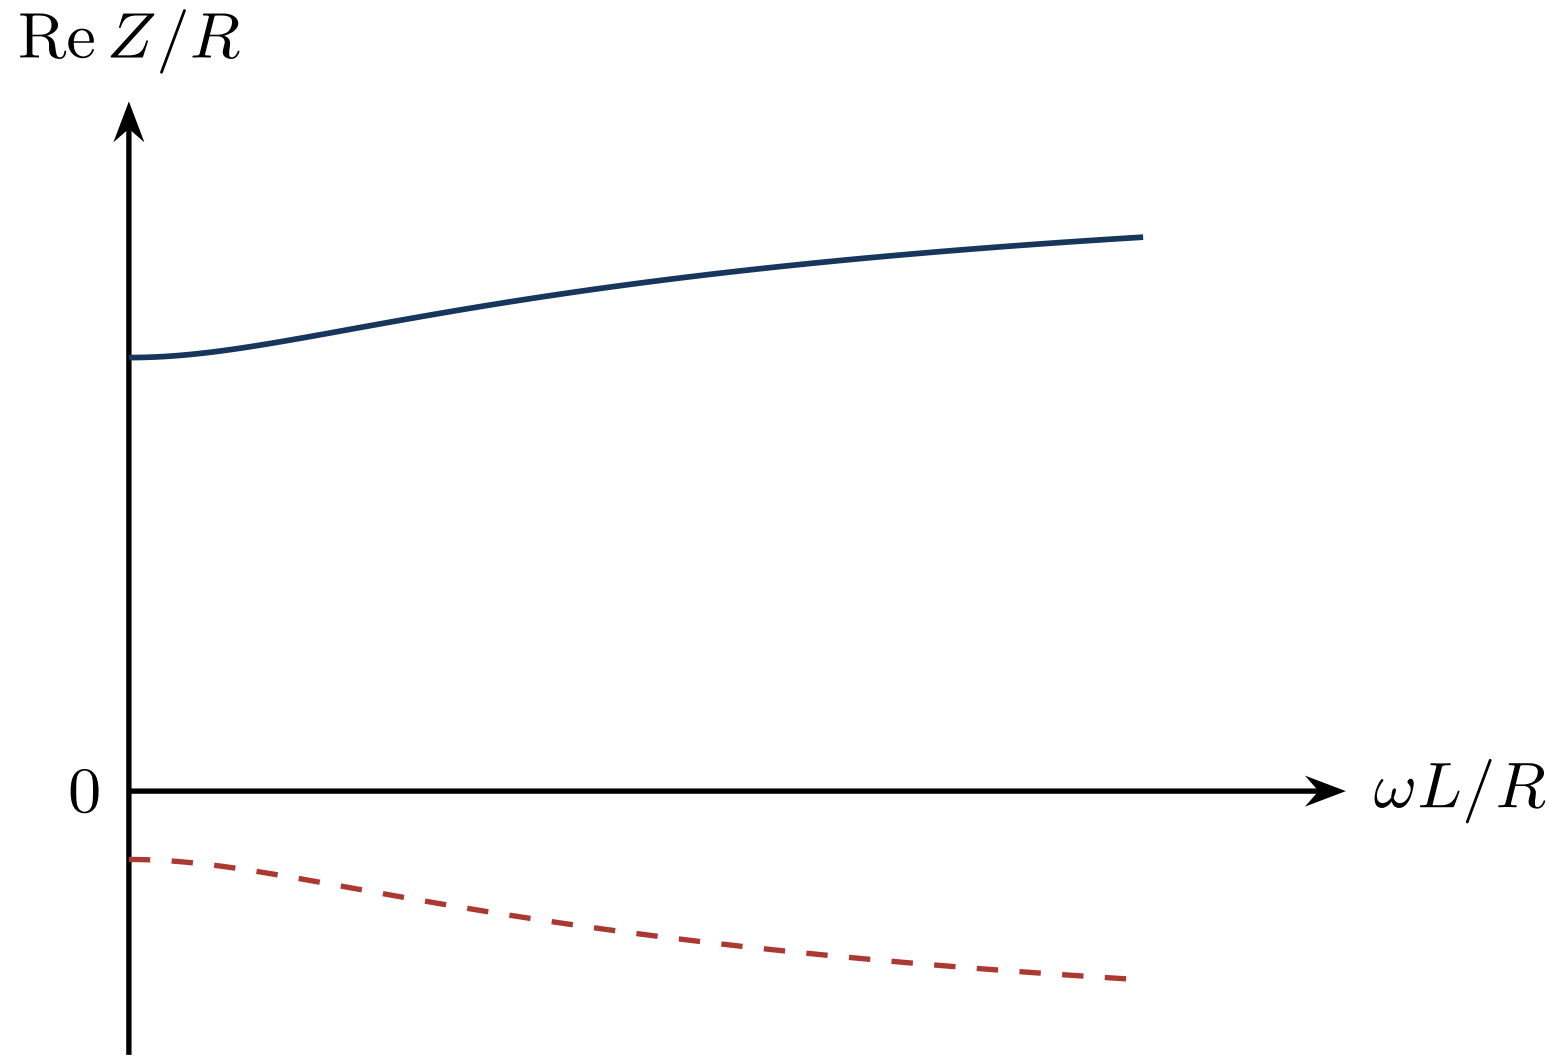
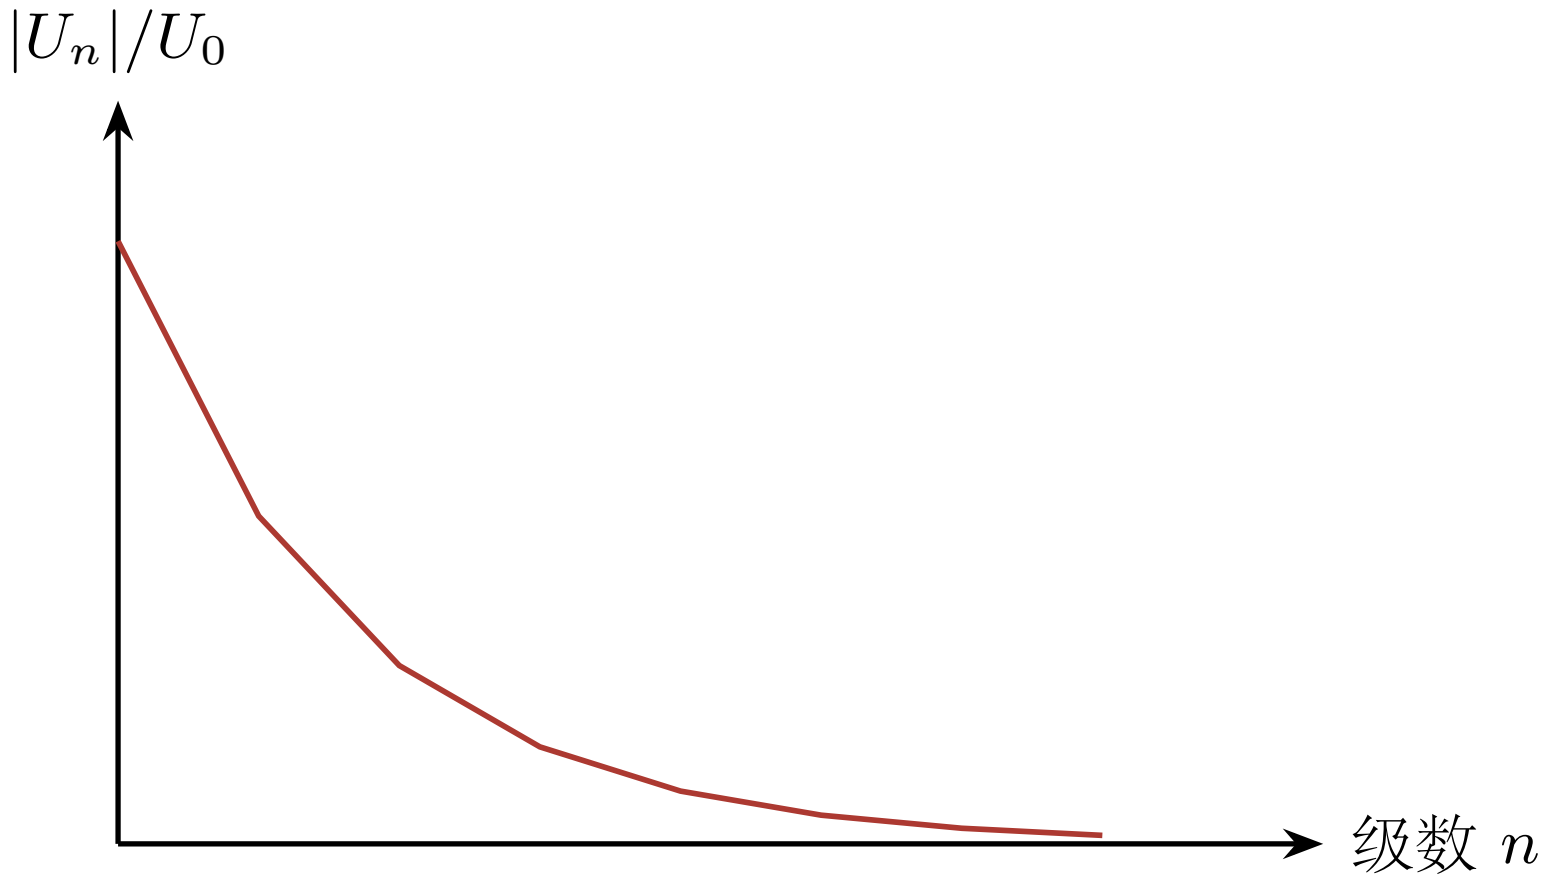
每级先横向 2^nR，再纵向串联 2^nR 与 2^nL



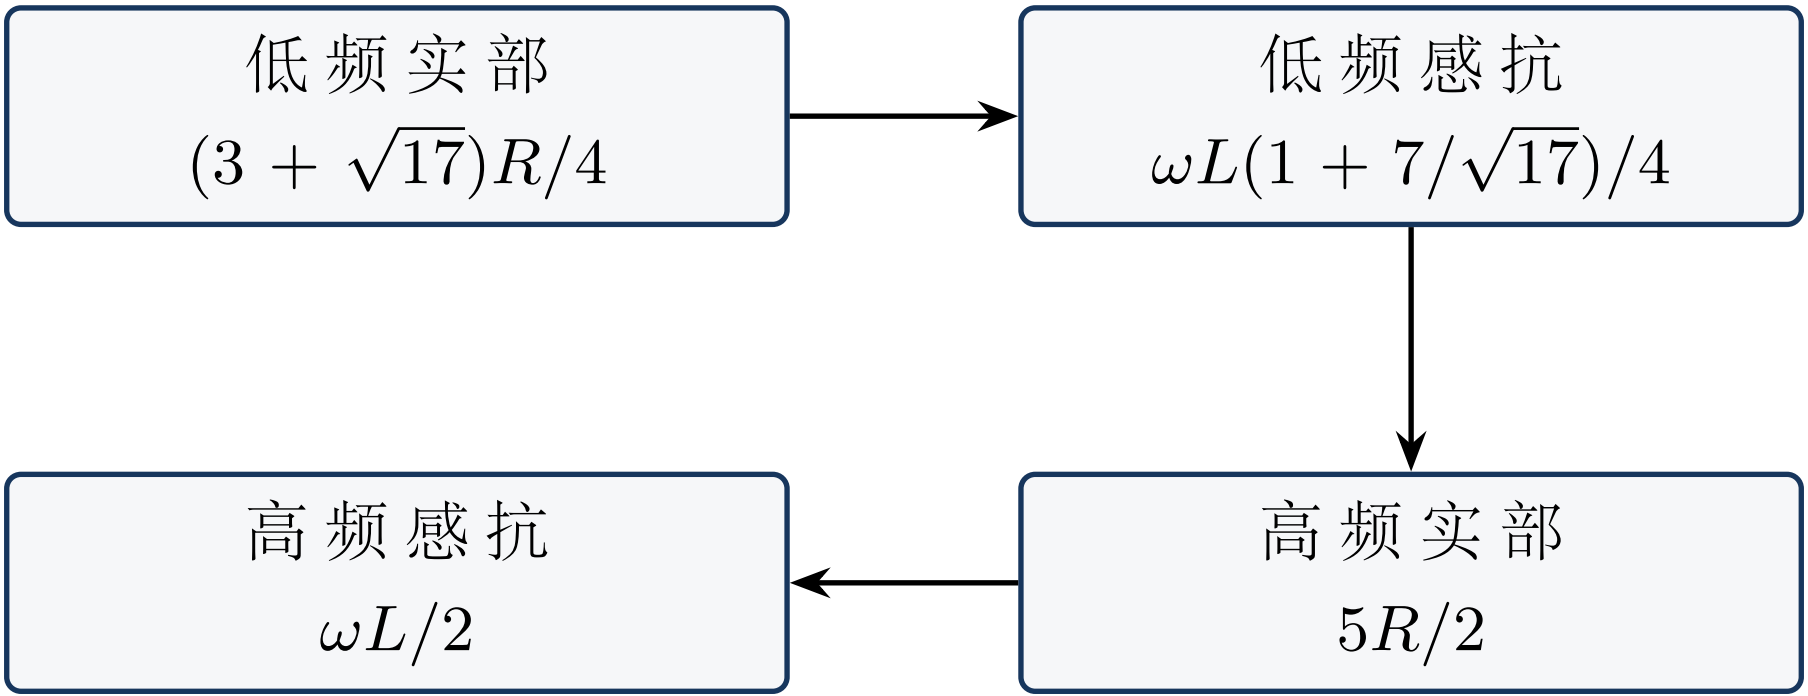
圈出的余网拓扑不变，但每个阻抗都乘二



蓝线为物理解，红线为负实部的减号根
横轴为零实部；减号根不是被动输入阻抗



示例 $\omega L/R = 1$；电压按 $|\rho|^n$ 衰减



有限级反向递推与总耗散和可独立检查解析根
