
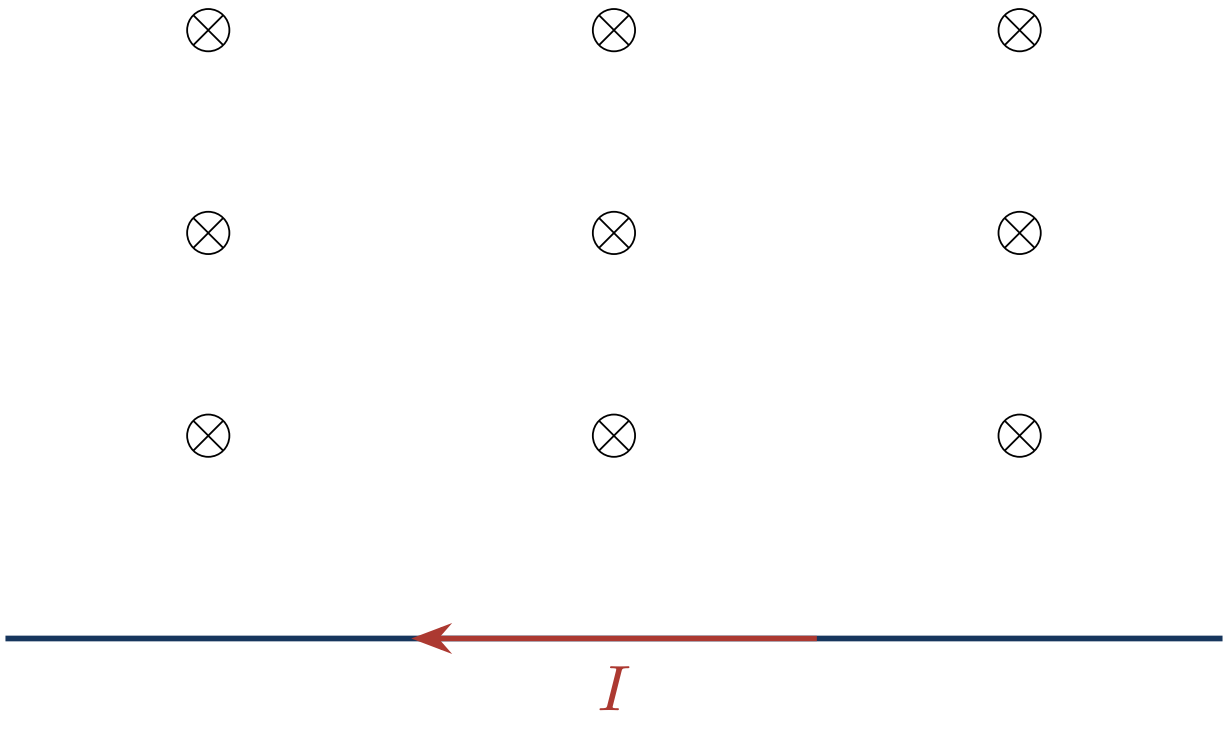
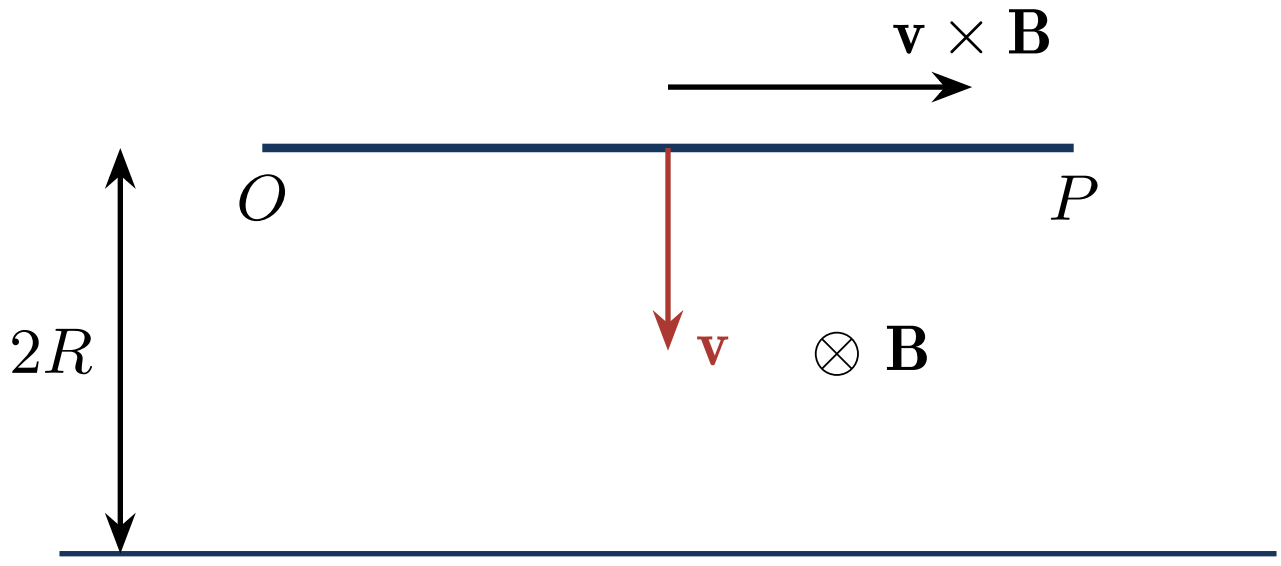
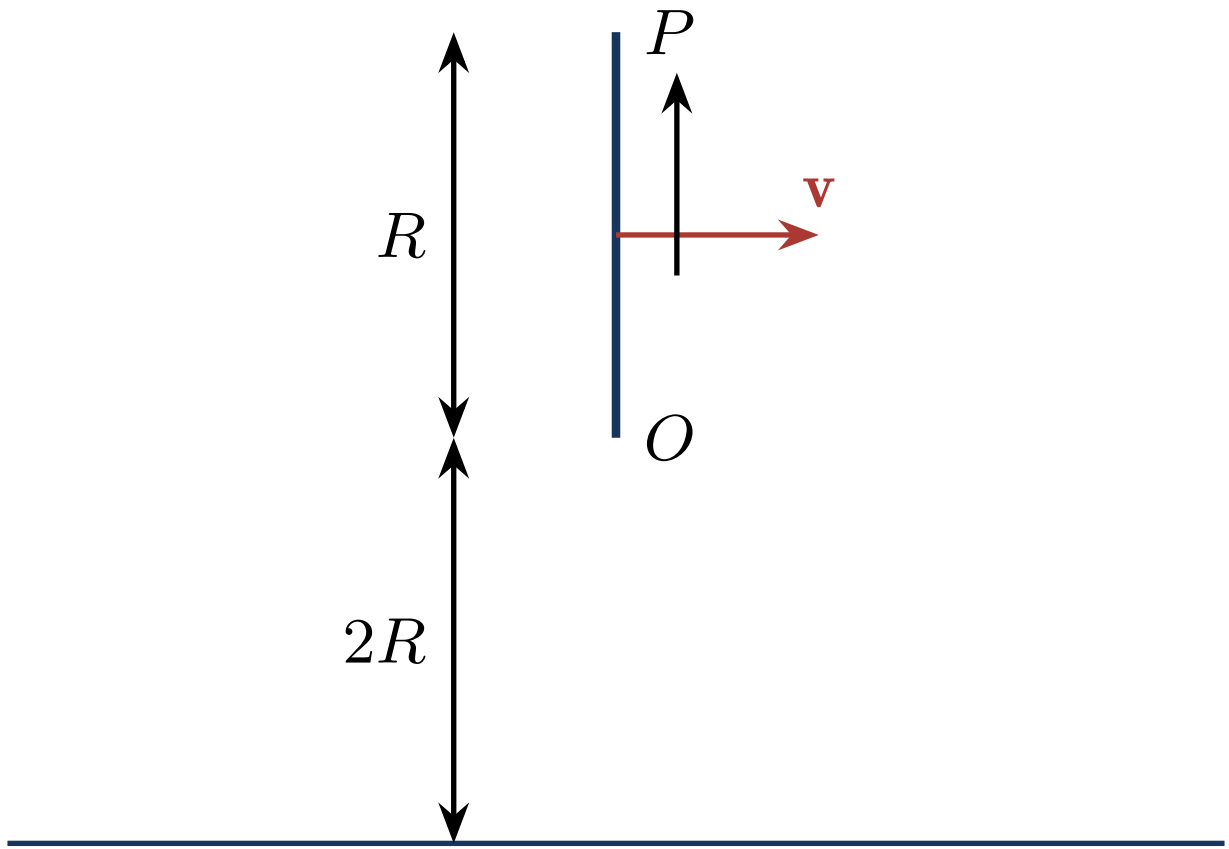
导线到轮缘最低点间隙为 R，到轮心为 $2R$



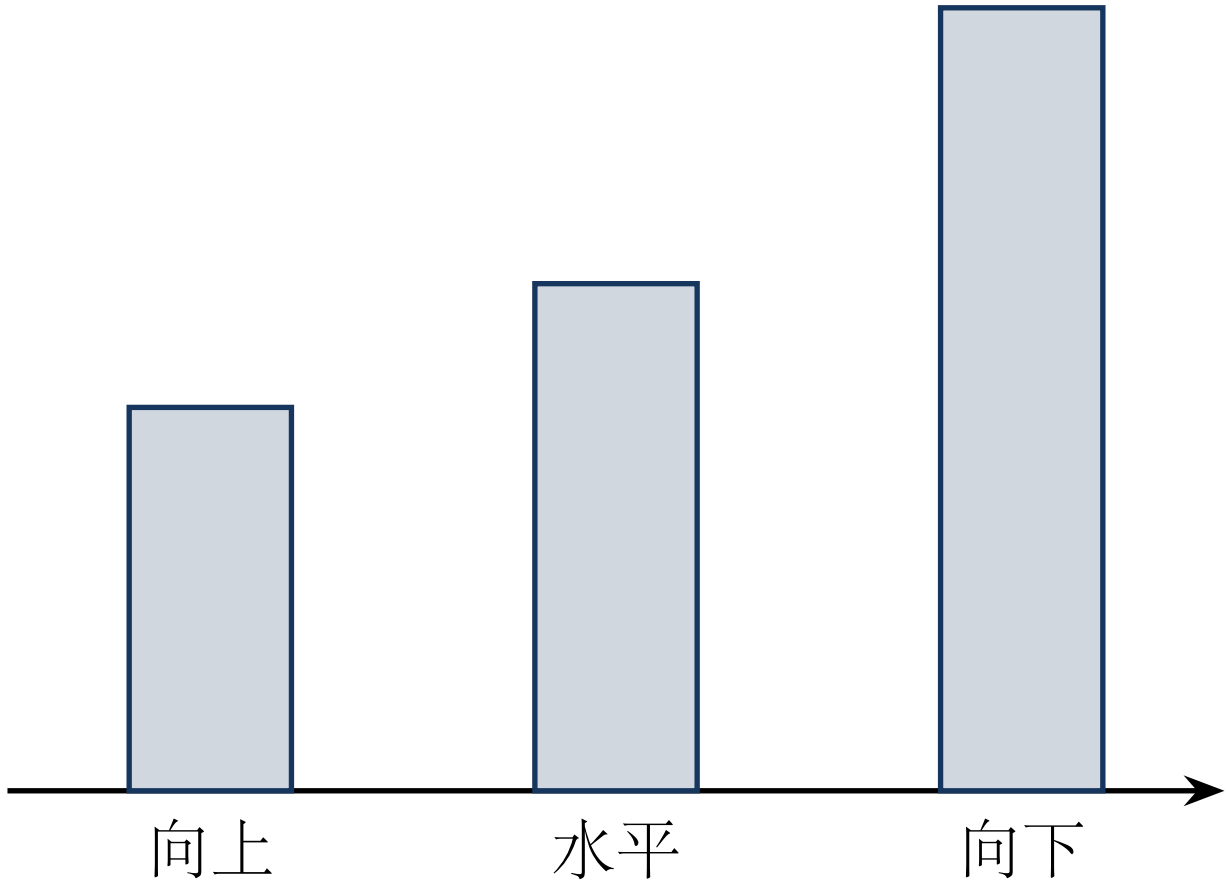
导线上方磁场向纸内；$B = \mu_0 I/(2\pi d)$



磁场沿水平辐条恒定，速度随半径线性增加



向上：导线距离为 $2R + r$，动生积分含自然对数



共同系数 $\mu_0 I\omega R/(2\pi)$

系数依次为 0.189070、0.25、0.386294
