
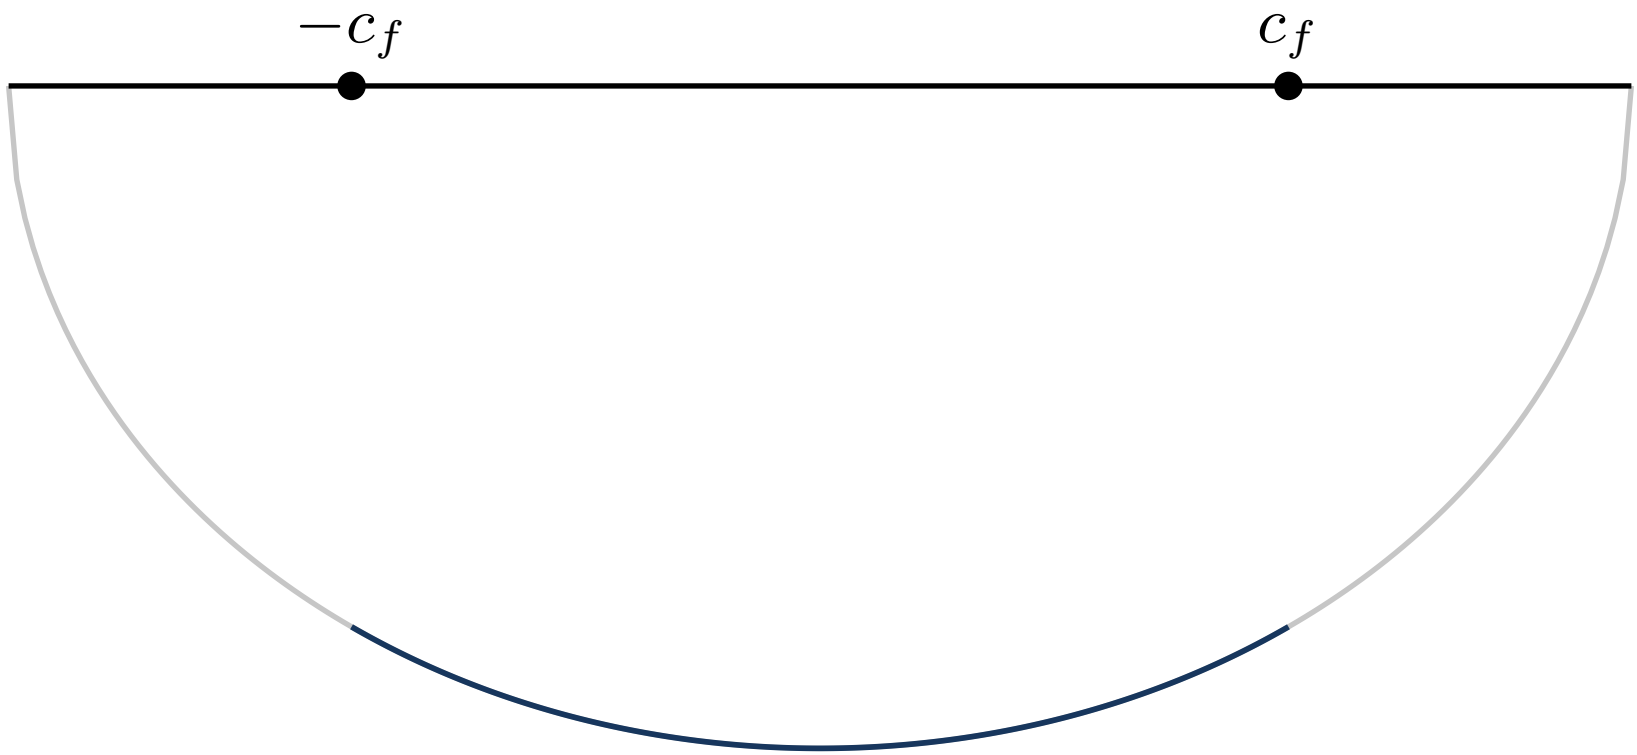
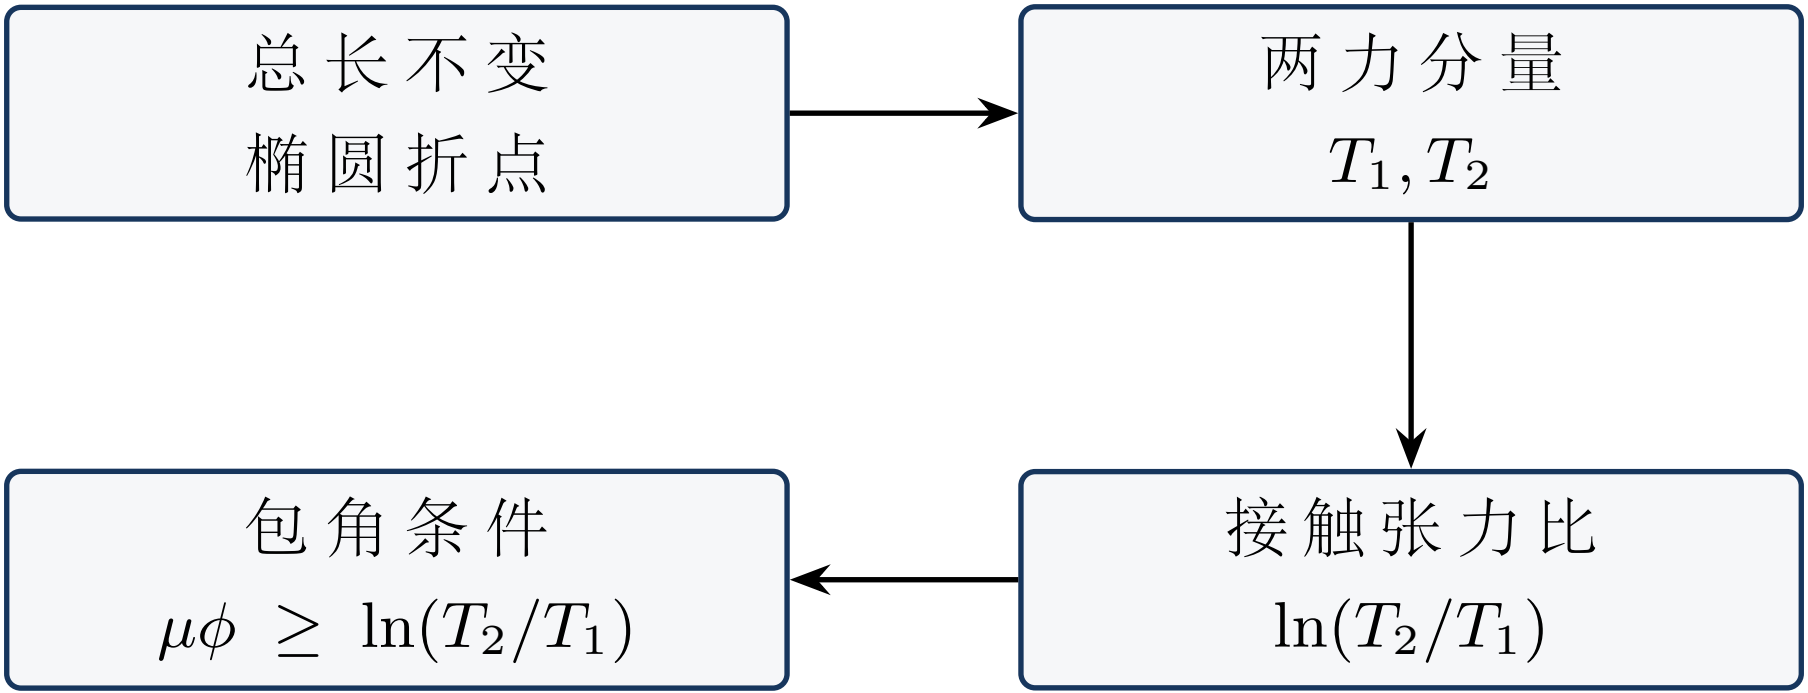
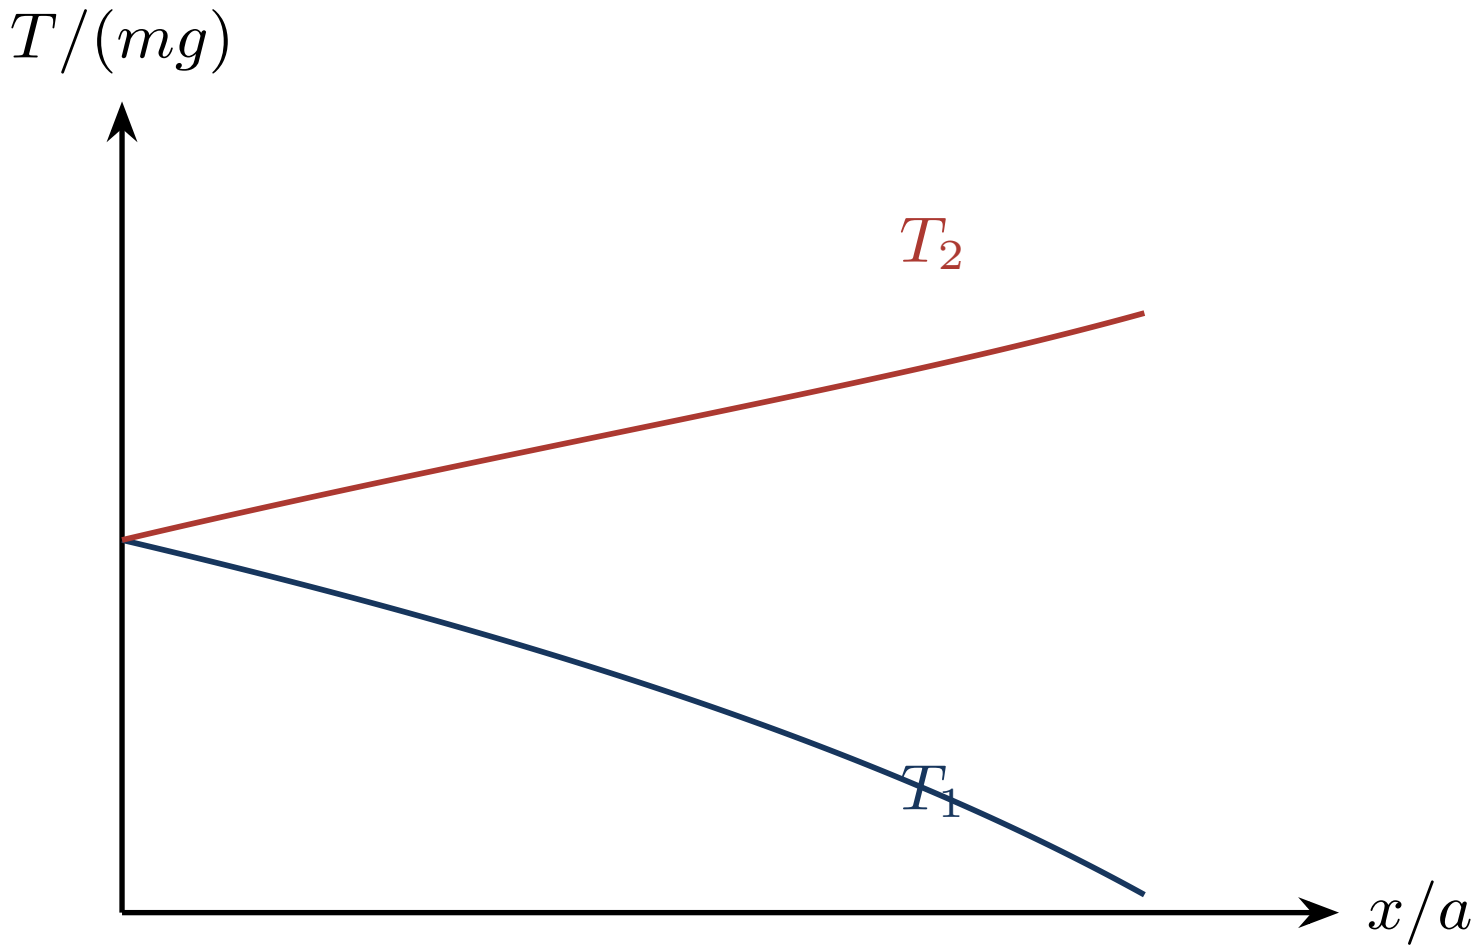
$|AC| + |CB| = 2a$；图中绳折点为小轮近似接触位置



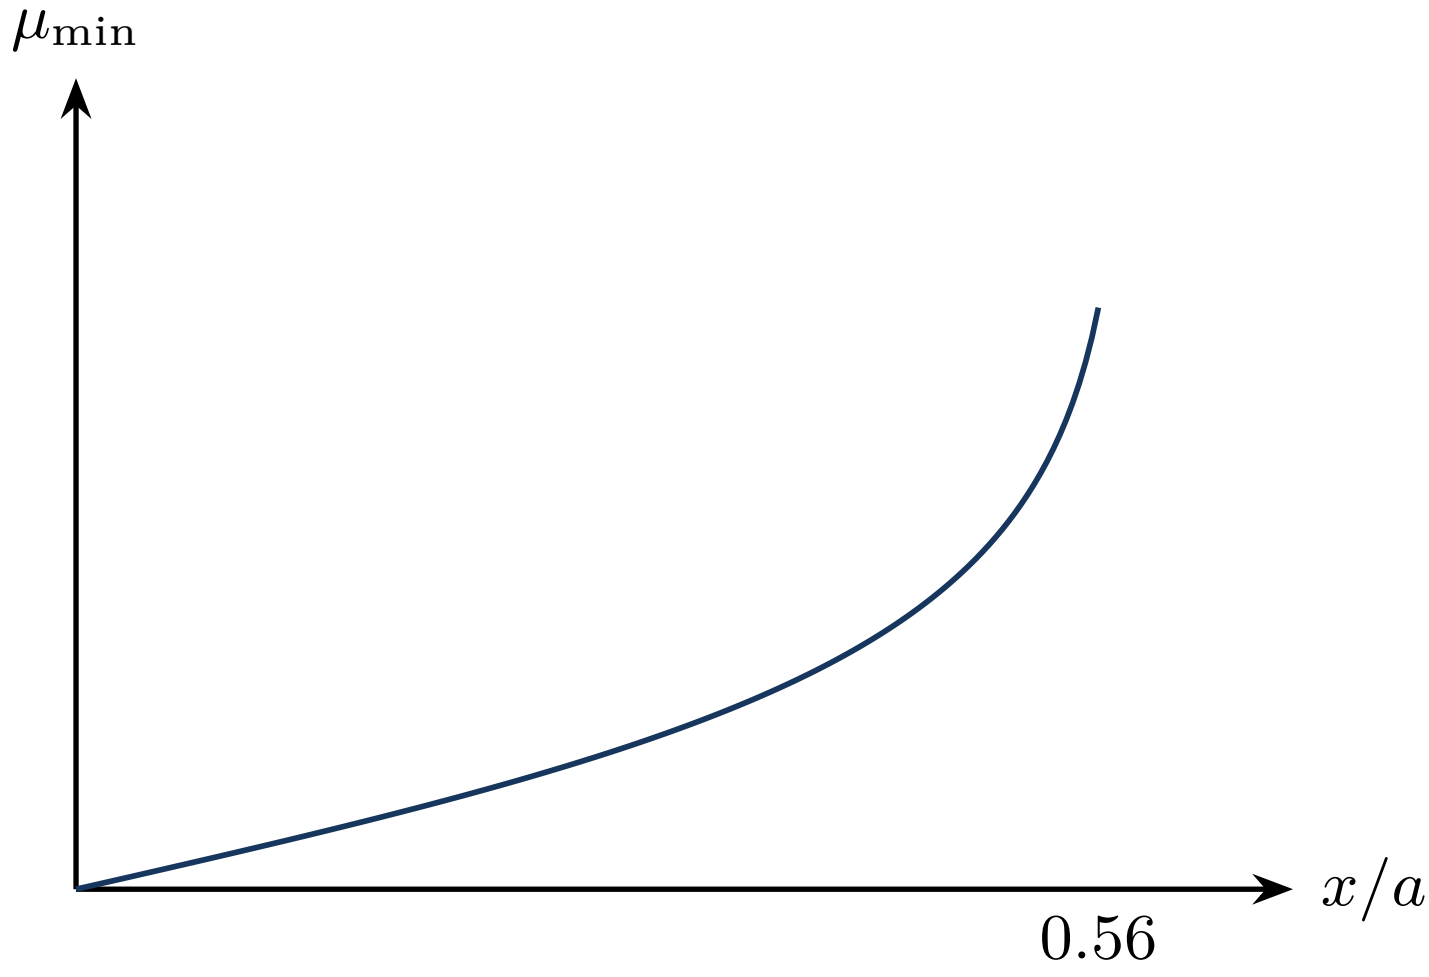
蓝色：两侧正张力可平衡区；灰色：数学椭圆其他部分



驱动转矩 $r(T_1 - T_2)$；右移时需顺时针驱动



最低点张力相等；右侧 $T_2 \quad > \quad T_1$



$x = 0.3a$ 时 $\mu_{\min} = 0.410127$；接近焦点时发散
