
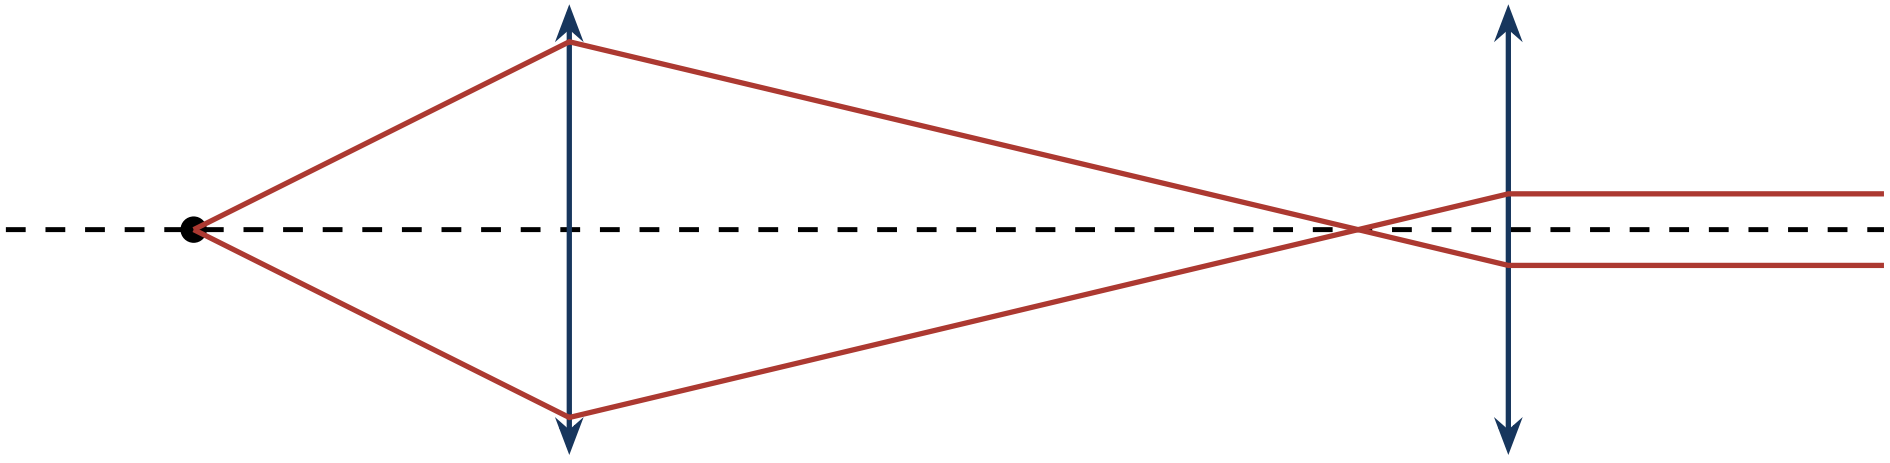
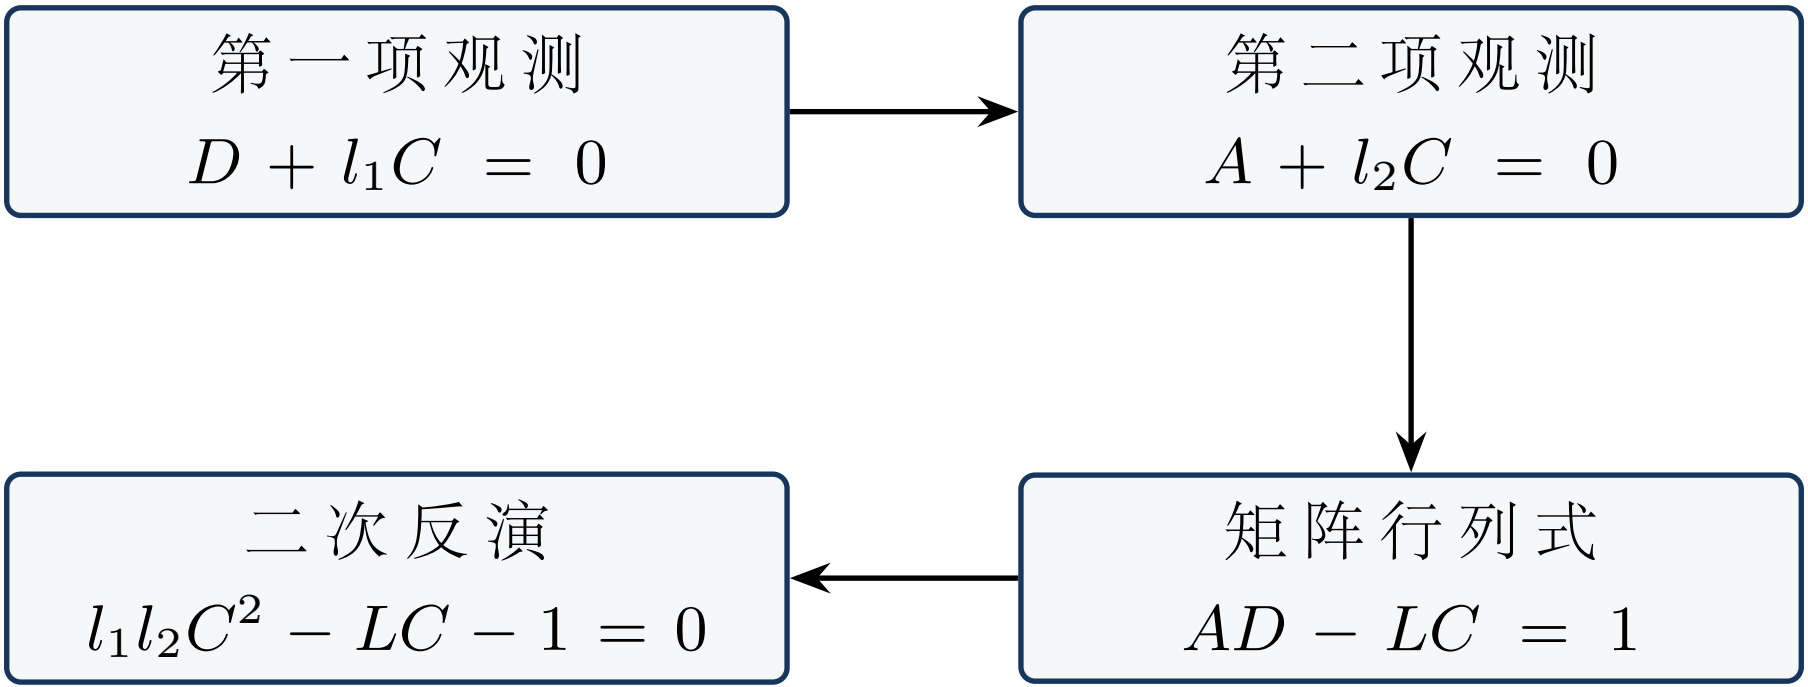
第一束右侧平行；第二束由左侧平行入射并聚焦

短焦距组

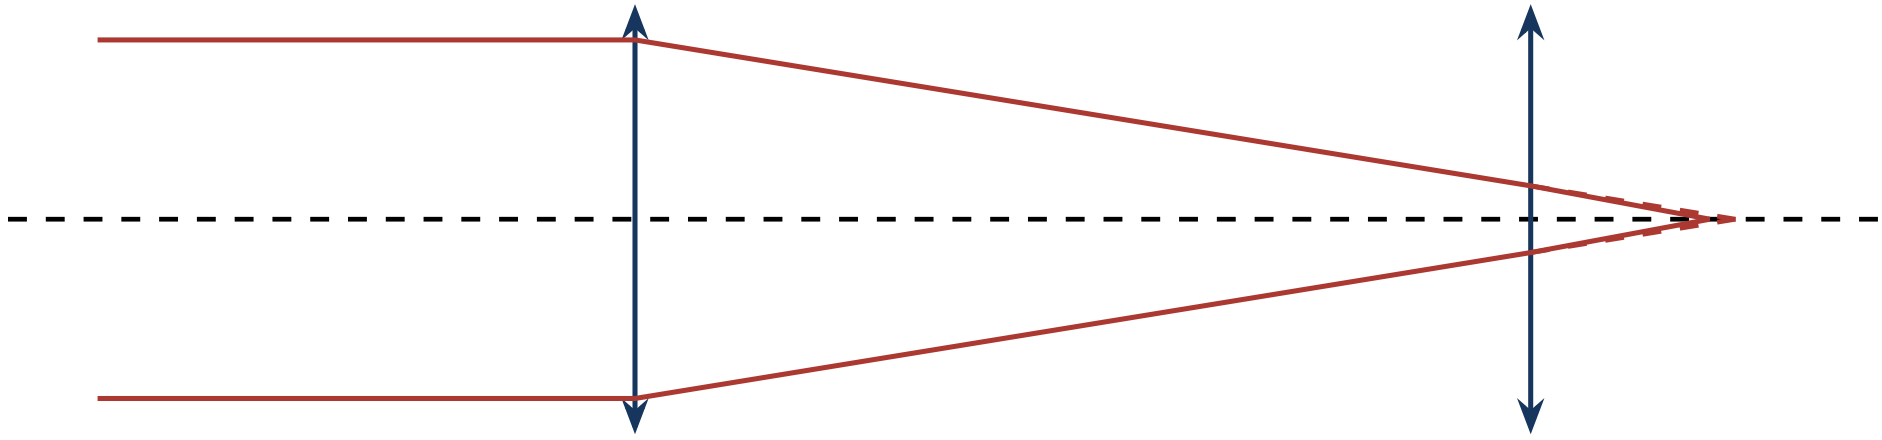


第一束在两镜间形成实际交叉点；$L - f_2 > 0$



两个 C 根都需回代；本题两个焦距组合均为正

长焦距组



第二镜收到会聚光；虚物在右侧，物距 $L - f_1 < 0$

短焦距组

$(6.782161, 3.923242)$ cm

$f_{\text{sys}} = -1.861407$ cm

长焦距组

$(30.717839, 39.826758)$ cm

$f_{\text{sys}} = 26.861407$ cm

两组均满足外部观测；可增加“镜间是否实际交叉”选解
