
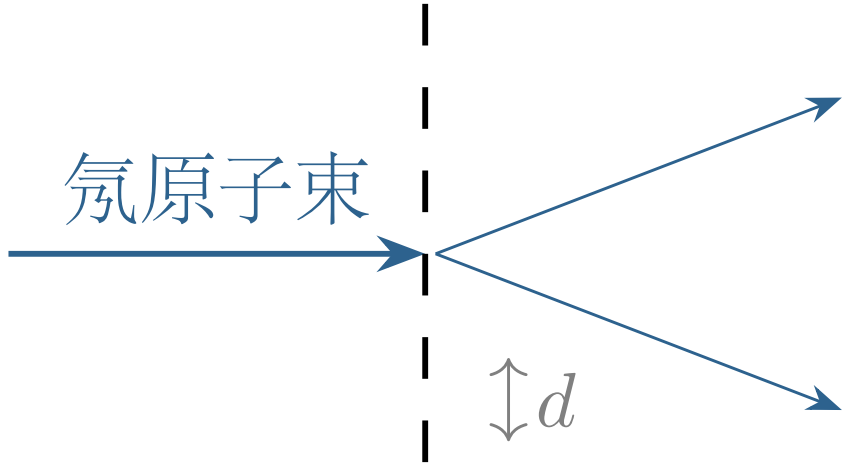
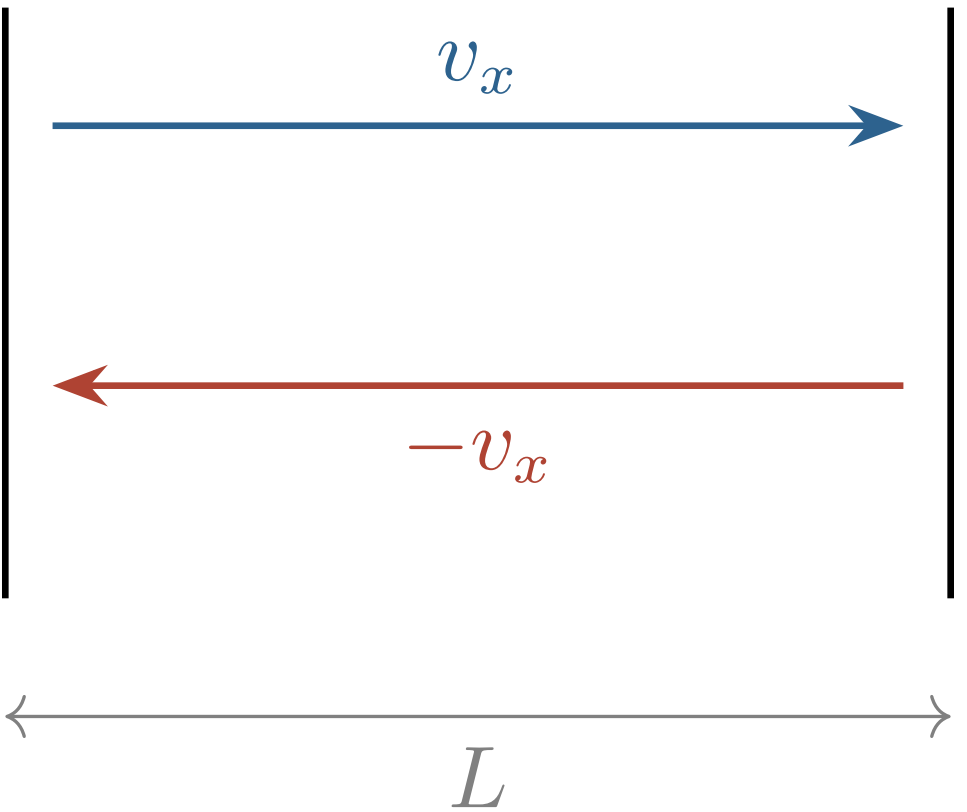
气体：$PV = Nk_BT$



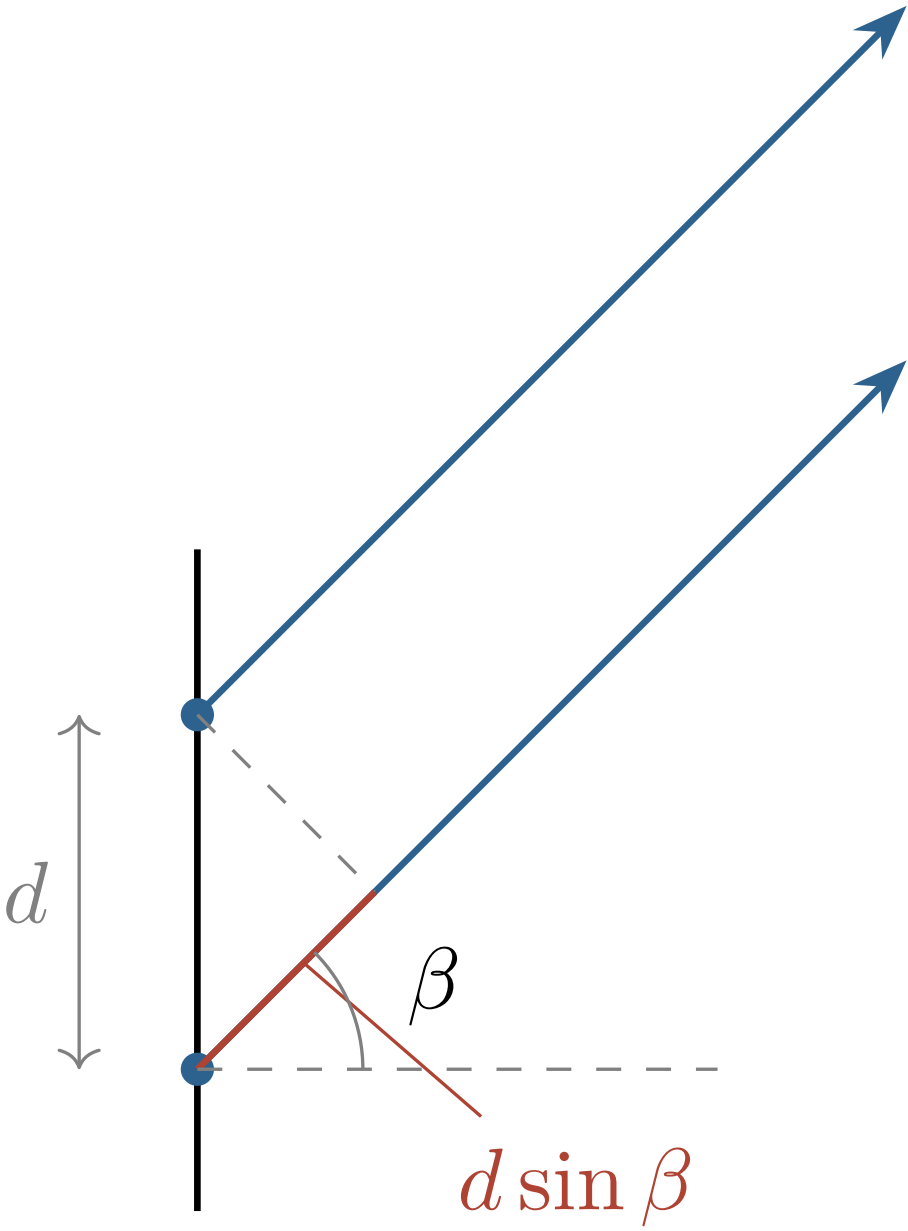
$\lambda = h/p,\ \ d = 0.5\,\mathrm{nm}$

碰同一面墙：$\Delta t = 2L/|v_x|$

传给墙的动量：$2m|v_x|$



各向同性：$\langle v^2 \rangle = 3\langle v_x^2 \rangle$



相长条件：$d\sin\beta = j\lambda$
