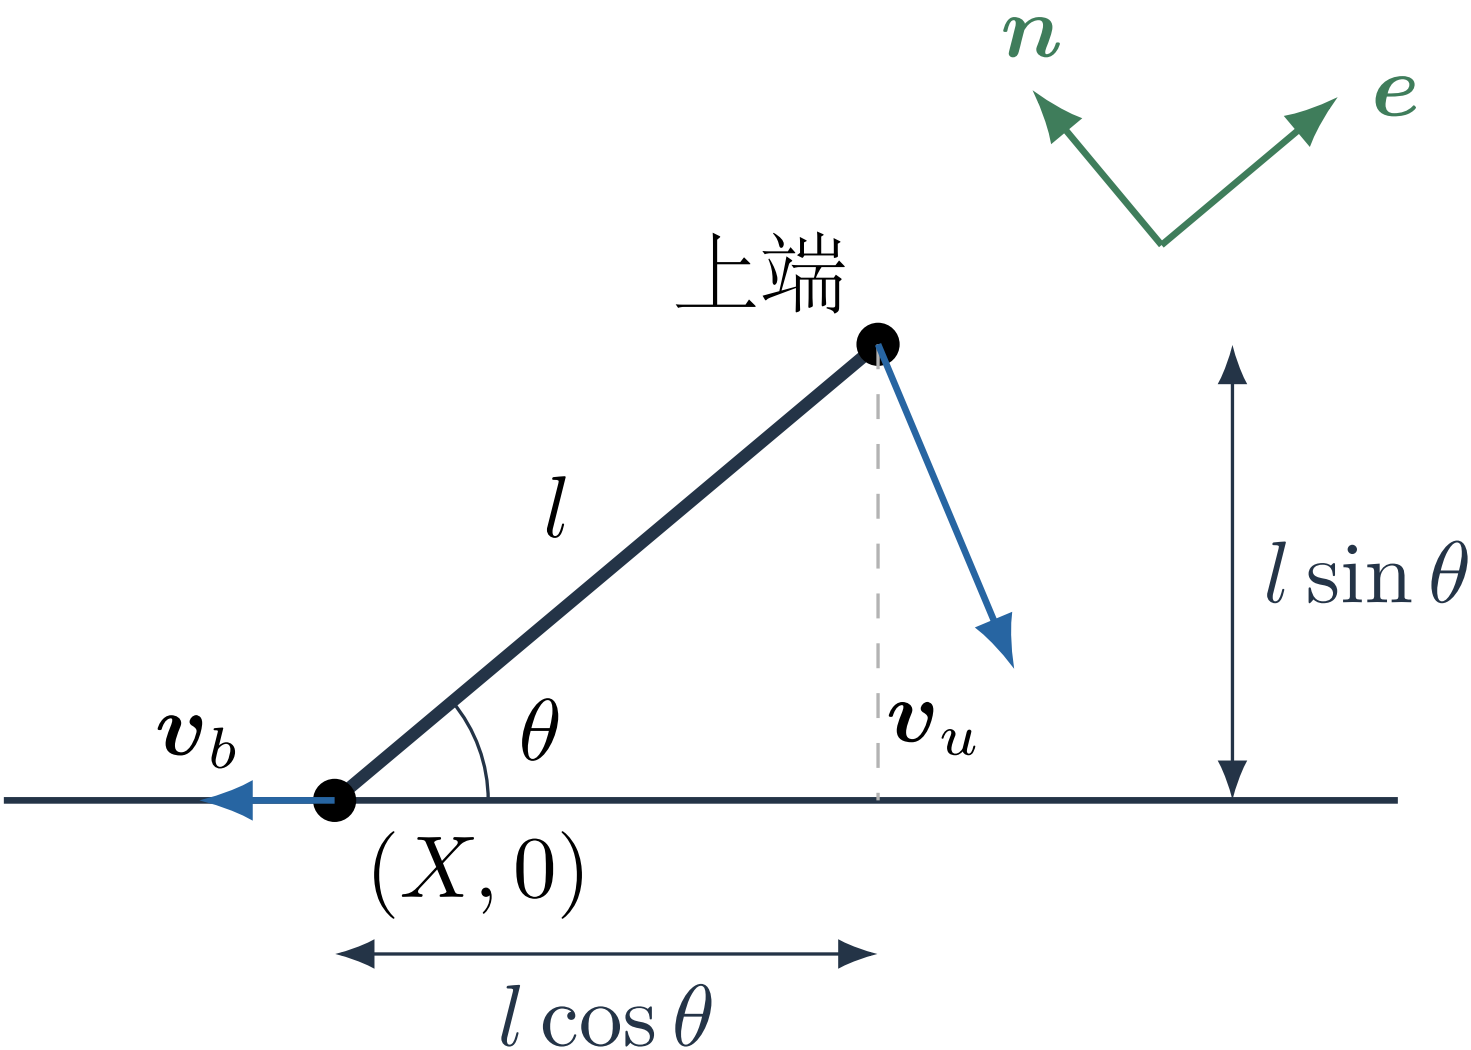
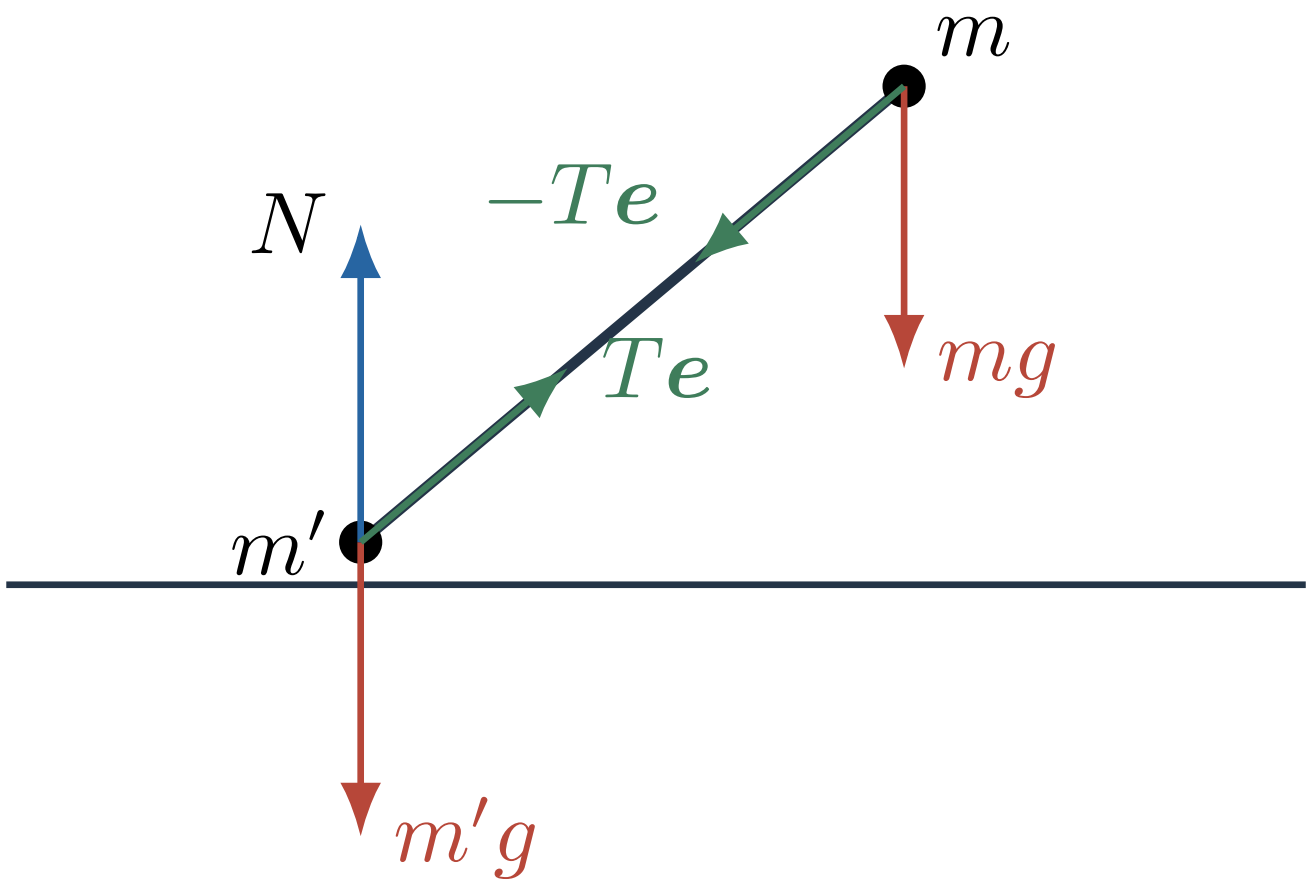
微扰后倒下
m
l
y
x
m′
光滑水平桌面



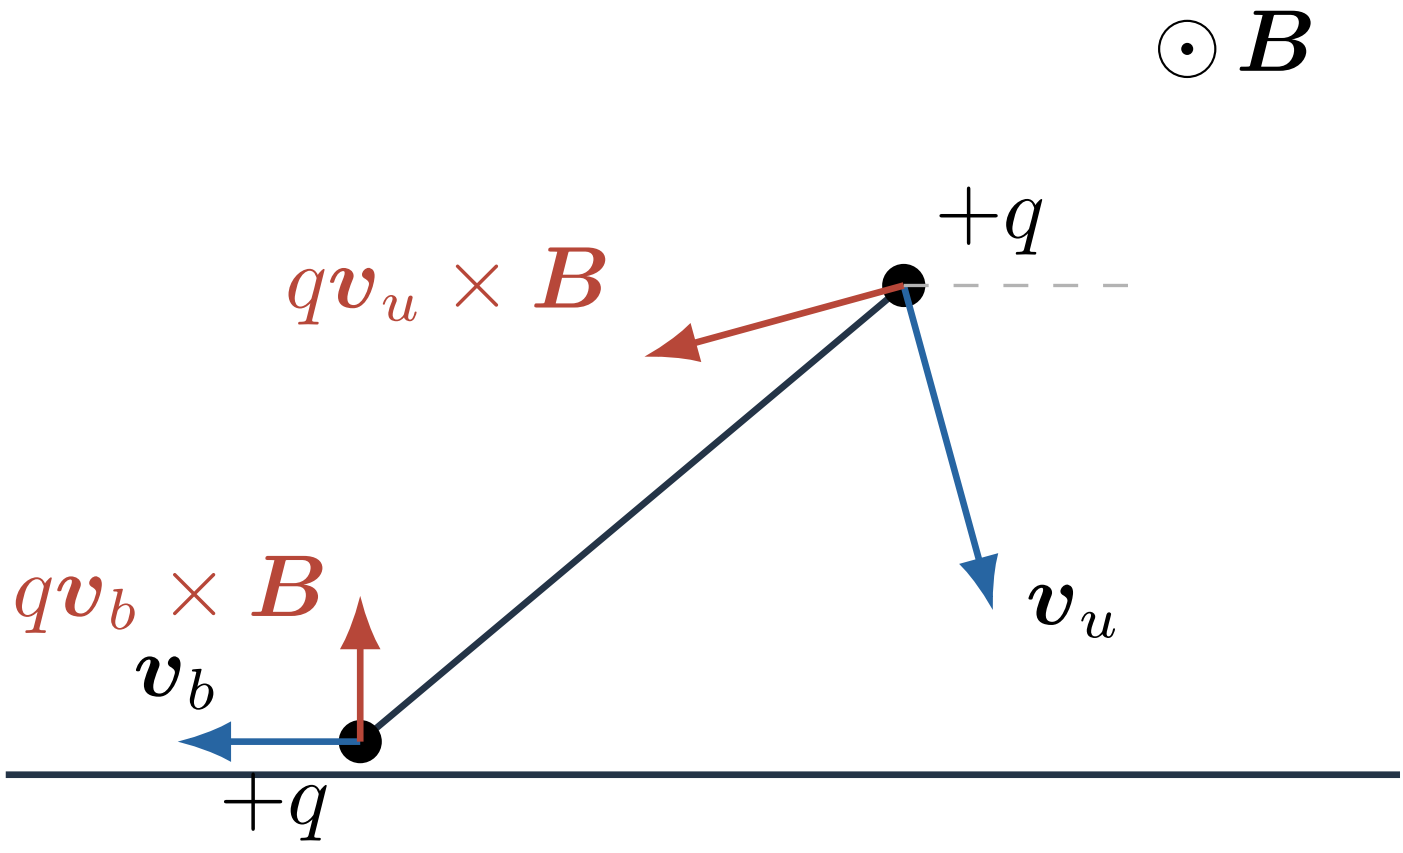
$$\boldsymbol{v}_u - \boldsymbol{v}_b = l\dot{\theta}\,\boldsymbol{n}$$

倒下支：$\dot{\theta} < 0$



$T > 0$：拉力；$T < 0$：压力

无磁场时底端竖直平衡：$N = m'g - T\sin\theta$



$$\boldsymbol{F}_B = qB(v_y, -v_x)$$

图示倒下支速度；磁场力与各自速度垂直
