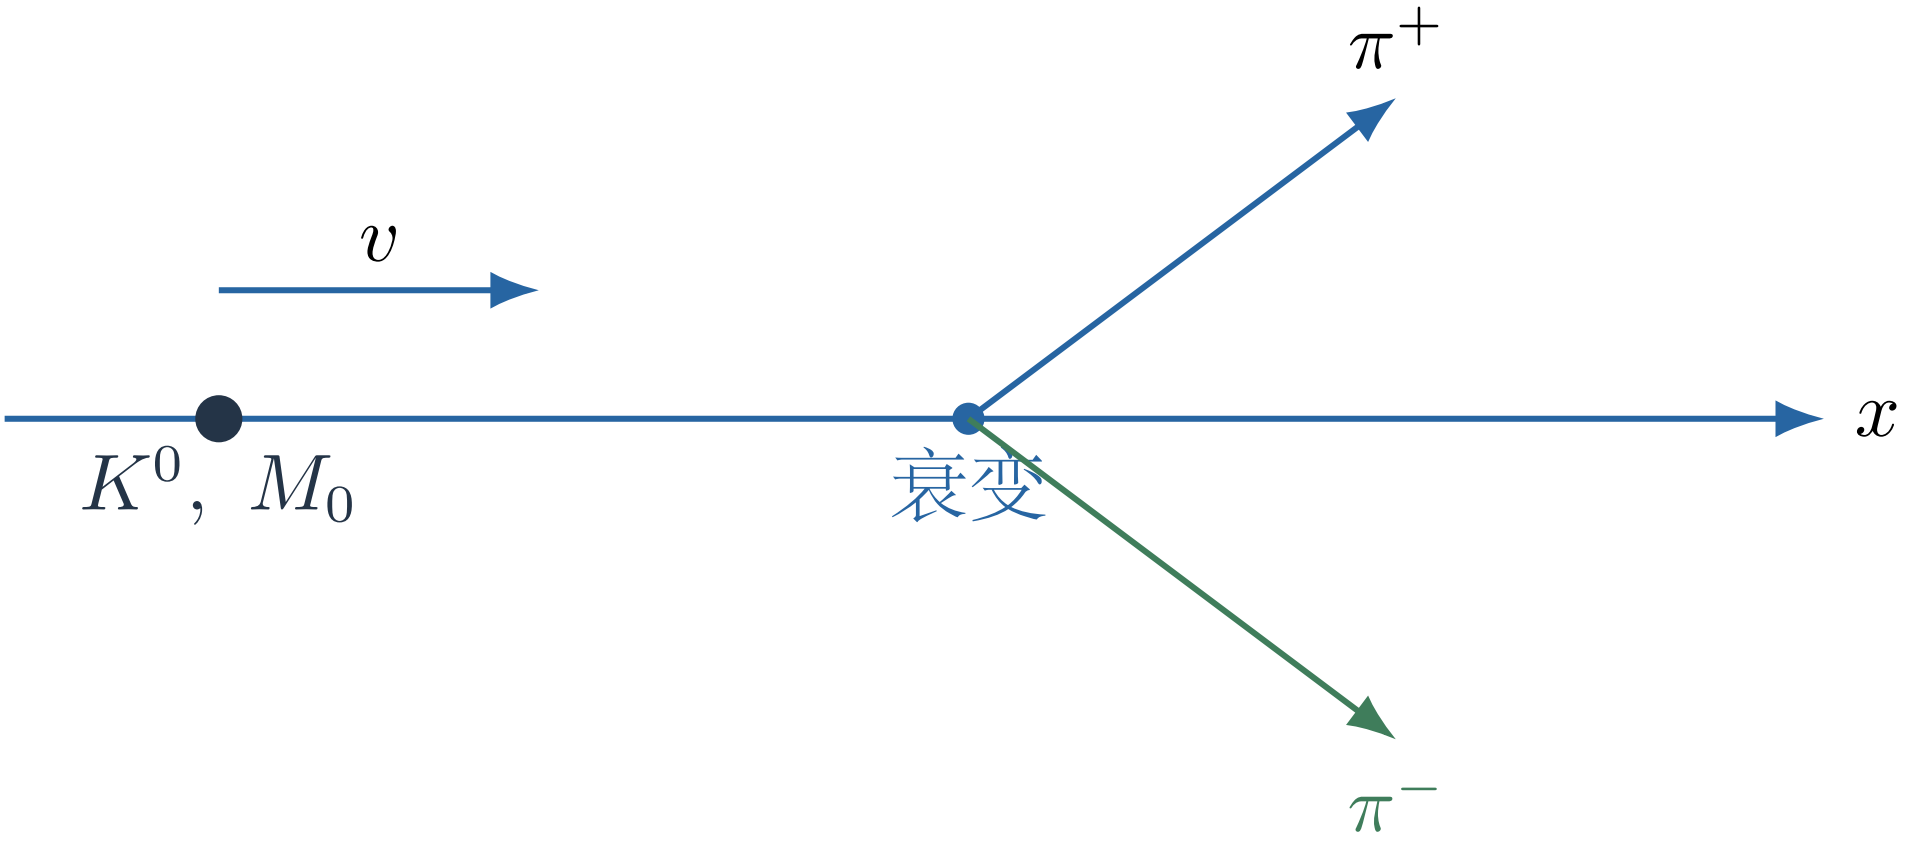
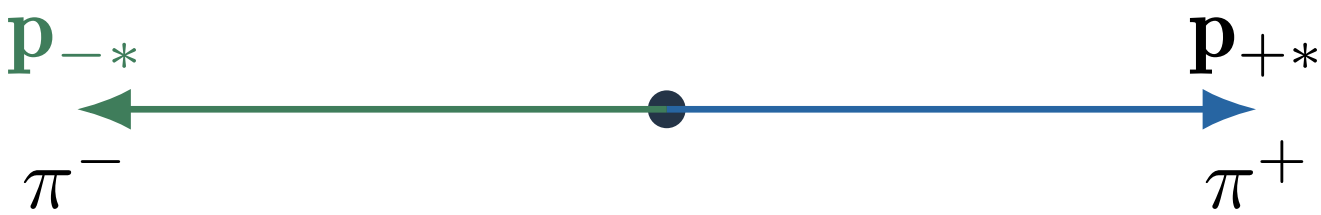
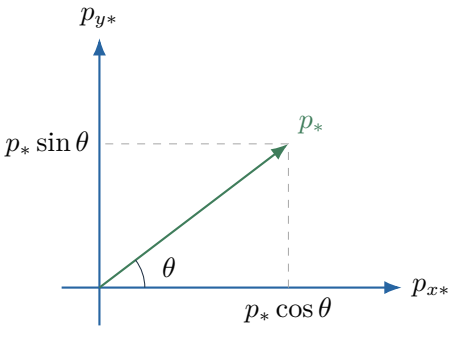
实验室系；两子粒子静止质量均为 m_0



K^0 静止系：总动量为零



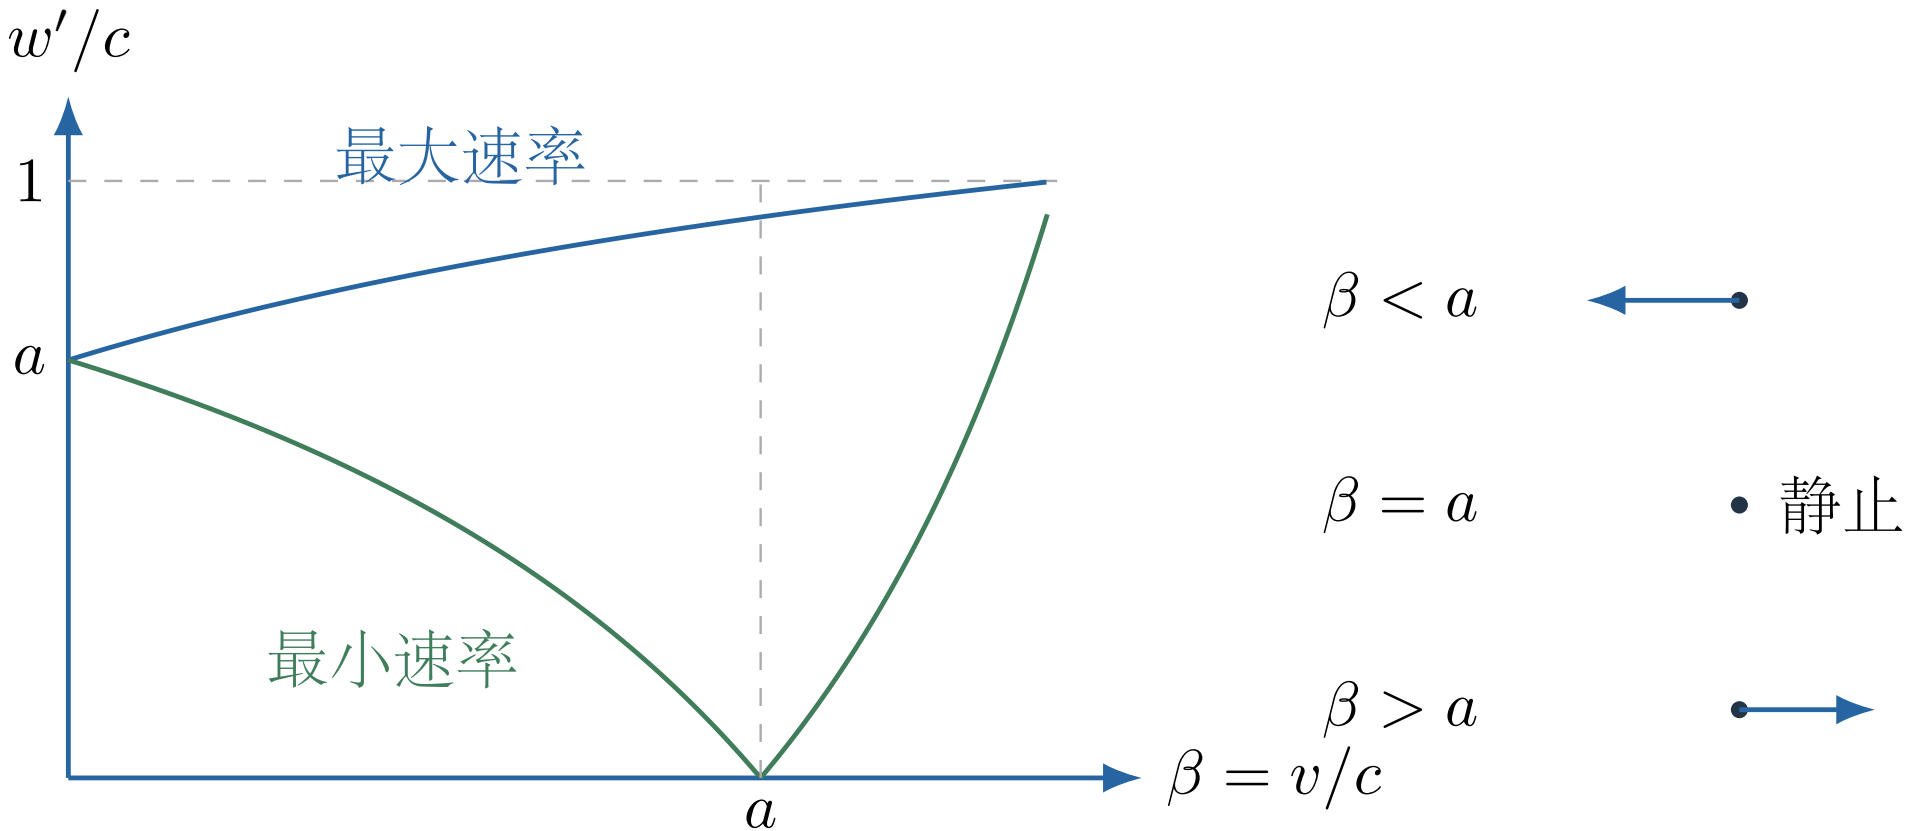
$$E_{+*} = E_{-*} = M_0 c^2/2$$



洛伦兹变换

沿 $+x$，速率 v

$$
\begin{aligned}
E &= \gamma(E_* + v p_{x*}) \\
p_x &= \gamma(p_{x*} + v E_*/c^2) \\
p_y &= p_{y*}
\end{aligned}
$$



示意取 $a = 0.7$
